INDEX.
Part I.
1. Russia's Tall Talk Makes Japan Hot.
2. Cut Down Values.
3. Morton's Men Hit Surplus Hard.
4. Proper Valuation of Real Estate of the Equitable Entails Great Loss.
5. Careful Examination of Every Piece Will be Instituted by Him.
6. Directors Against Whom Suit is Brought Have Cornered the Legal Talent.
7. NEW YORK, Aug. 3.—[Exclusive Dispatch.] Paul Morton's expert accountants have made discoveries that point to exceedingly reckless, if not criminally culpable methods of valuing real estate on which the millions of the policy holders of the Equitable have been loaned. In addition to entailing great loss to the society because of inadequate security, the proper valuing of this real estate will materially reduce the \$50,000,000 surplus.
8. THE CITY. War to last spur between poultry associations, and two shows to be held same time...
9. THE TIMES. Scholarship Contest.
10. News of Neighboring Counties.

THE GREAT WAR.

BOUGHT LAWSON OUT.
H. H. Rogers Secures Copper Range Stock That Was Held by a "Disturbing Factor."
BOSTON (Mass.) Aug. 3.—[Exclusive Dispatch.] It develops that the pocketbook of Harry H. Rogers is supplying the funds for the big purchases of Copper Range stock from Thomas W. Lawson's holdings that have taken place here in the last ten days.
Lawson is selling his stocks to "the System," but not because he is carrying out his plan of bankrupting "the System." The Lawson-Burrage alliance in the Copper Range and other deals has become odious to Rogers, who has tried to bring about a severance of these relations, which would eliminate a disturbing factor.

WRECKED BRAIN ON "EXAMINER."
Former Hearst Employee Has Crazy Spell as Result of Working in Los Angeles.
LOS ANGELES, Aug. 3.—[Exclusive Dispatch.] Frank Carper, the young Democratic politician who turned down the county clerkship nomination four years ago, went insane on a Lake El Estero freight train last night and let him off. He said he was a detective and a reporter and told Elkhart officers that three desperate criminals were in a freight train, and to search for them. When the train was stopped, he saw or wild he was arrested.

FORBIDDEN TO POOL PRICES.
LINCOLN (Neb.) Aug. 3.—Judge Barnes of the Nebraska Supreme Court today granted a temporary injunction against the Nebraska Grain Dealers' Association, which is alleged, is operating as a trust and in restraint of trade. The association is forbidden to pool prices or accept rebates; and, pending the injunction, the officers of the association must not act as officers and new officers must not be elected. The action is brought by the Attorney General of the State, under the law, passed by the last Legislature, framed along the lines of the Sherman law.

SULTAN GETS COLD FEET.
PARIS, Aug. 3.—Information from Fez reaching official quarters showed that the Sultan of Morocco, who first proposed an international conference, now fears that the conference among the Powers will result in the dismemberment of his country. He has therefore called together a number of chiefs, who have decided that outside interference in Moroccan affairs is not necessary. The Sultan has since shown opposition to holding a conference.

FORESTERS TO CANADA.
ATLANTIC CITY (N. J.) Aug. 3.—The executive council of the United Order of Foresters, at a meeting of the committee today, endorsed the plan for the purchase of big tracts of land in Northwest Canada for settlement by members of the order.

FRANCE GETS SOME RETURNS.
ST. PETERSBURG, Aug. 3.—The French and Russian commissions have reached a substantial agreement as to the terms of a new commercial treaty. The treaty provides for lower duties on French linen and probably will include a provision against increasing the French minimum duties on Russian products during its life.

With the negro flocking to the city, Louisiana and Mississippi planters have had a difficult problem to solve in obtaining adequate labor to till their fields. Thousands of Italians have in recent years replaced negroes in the sugar fields of Louisiana and the Italian is usually an excellent laborer, there has for some time been a strong movement to provide such facilities in the way of an immigrant station as would divert to this gateway a larger proportion of Italian immigrants.

Concomitant with these are almost hopeless and entirely inadequate medical services until they fall into the hands of a doctor are considered as partly responsible for the heavy mortality among victims of the fever. It is said investigations have shown heavy food like macaroni and cheese has been taken by victims after the fever has attacked them. That means almost certain death.

Milk is the principal diet, with alkali waters and the juice of watermelons to work on the kidneys. The doctors prescribe the place of ice, to be dissolved in the mouth. Many of the Italians die because they do not get this treatment until too late. Consequently few beside Italians have been attacked and some of these exceptions are already on the streets, little the worse for illness.

There has been a gradual tightening of quarantine lines everywhere, with its attendant deterrent effects on business generally. Several localities refuse to accept mail until it has been fumigated.

Two fresh cases of fever reached the ship island quarantine station in the Gulf of Mexico Bay, yesterday. There are several other cases on the island, but all are reported contained. One new case developed today at Alexandria, La.

The excitement in the country districts seem to have grown more acute with the discovery of cases at other points.

A whole trainload of passengers on the Iron Mountain road has been held up in Concordia parish, removed from any habitation for some time. The passengers have been lost in their protests to the railroad commission that they have had neither food nor water and that nothing has been done to relieve them from a distressing situation. Efforts are being made to move the train.

Monroe, La., has put fever on three sides of her, has put militia and armed citizens on every road leading to her limits.

New Iberia, La., has put a curfew law into effect.

Columbus, Miss., has decided to guard against infection by the use of rifles.

Many of the smaller towns are passing mosquito ordinances.

Alexandria has completely bottled herself up, but in order to save herself and the parish from starvation, she has permitted the running of a train, through the quarantine three times a week, to bring in provisions and other supplies.

FREE MOSQUITO BARS.

In order to aid those Italians who are still well enough to escape infection, the authorities are making a large distribution of mosquito bars to poor families.

In Mississippi, the State Board of Health has issued an address to the people, ordering that all public meetings, such as gatherings of lodges, be discontinued for thirty days. While rigid quarantine is in effect here, Dr. W. F. Branner, principal health officer of Savannah, Ga., formerly of the Marine Hospital Service, who came here to investigate the situation in order that his board might act intelligently in the matter of quarantine, has finished his work here and started home today.

Surgeon Wadsworth, of the Marine Hospital Service, today wired Gov. Blanchard that the cutter Winona has taken to ship island all the boats which desired to enter Mississippi from New Orleans. Dr. Wadsworth said the boats could have returned to New Orleans if they desired and that there is no discrimination against Louisiana boats. Gov. Blanchard wired Dr. Wadsworth, asking him what authority he has to prevent public waters from being taken to ship island, declaring that they have right to navigate all navigable waterways of the United States, providing they do not touch Mississippi shores during the quarantine.

SHAW SENDS INSTRUCTIONS.

WASHINGTON, Aug. 3.—Secretary Shaw has received a telegram from Gov. Blanchard of Louisiana complaining of the action of the revenue cutter Winona in connection with the quarantine established by the State of Mississippi, and today sent the following reply:

"As authorized by law, revenue cutter Winona, has been detailed to assist in the quarantine of Louisiana boats in maintenance of quarantine established by the State of Mississippi. The State of Mississippi having established a quarantine, the act of Congress approved Feb. 15, 1893, has been violated; and if so, wherein."

The act of Congress referred to in the Secretary's telegram directed the Public Health and Marine Hospital Service, under the supervision of the Secretary of the Treasury, to see that health authorities in maintaining quarantine against infectious disease and clothes the Secretary with power to enforce quarantine regulations whenever, in his judgment, the public health requires it.

HAVE FEVER SYMPTOMS.

NEW YORK, Aug. 3.—Two persons with fever symptoms, two of them passengers and the remainder members of the crew, were received from the steamship Advance at Quarantine today and taken to Hoffman Island, the steamer came from Colon, having on board several employees connected with the Panama Canal.

COVERED UP HIS CRAFT TRICKS.

More Testimony Relative to Political Retardance in Missouri Heard at Trial of Senator Farris.

JEFFERSON CITY (Mo.) Aug. 3.—Former Lieut. Gov. John A. Lee received his testimony today in the trial of Senator F. H. Farris on the charge of bribery. Lee's denial of the former's testimony that he (Lee) wrote the letter sending the \$7000 in question back to D. J. Kelly of New York, representative of the baking powder interests, was taken up in a severe cross-examination of the defense. Several checks from Kelly to Lee were introduced and identified, but were not admitted in evidence by Judge Davis, who ruled that the inquiry should be limited to transactions that took place in St. Louis. This precludes the introduction of a number of letters and checks which the defense intended to offer as evidence.

When the cross examination was completed, the State took the witness on re-direct examination. Lee testified concerning the letter purporting to return \$7000 to Kelly which at the former's trial he had written but which he admitted that he had written the letter because he feared that there might be trouble at some time and the letter was for the purpose of covering up the transaction concerning the conveyance of the \$7000, but that he did not return the \$7000 to Kelly.

NATIONAL LEAD CAPITAL.

TRENTON, Aug. 3.—[Exclusive Dispatch.] Pursuant to a resolution adopted at the stockholders' meeting last May, the National Lead Company filed with the Secretary of State today an amendment to its charter, increasing its capital stock from \$20,000,000 to \$25,000,000. The new stock is to be divided into \$25,000,000 preferred dividends and \$25,000,000 common.

COMMUNICATION CLOSER.

HOUSTON (Tex.) Aug. 3.—Calculus Parish, Louisiana, today notified the Southern Pacific officials that no more passenger trains would be permitted to enter that parish after midnight tonight. This quarantine shuts off all communication between Houston and New Orleans, and prevents mail coming through directly.

BLANCHARD'S COMPLAINT.

CINCINNATI, Aug. 3.—The following dispatch from Gov. Blanchard of Louisiana has been received by the Times:

ing your query: Mississippi patrol boat plying between Lake Borgne and the sound which connects the lake with the gulf have taken the extraordinary steps of prohibiting Louisiana fishermen from fishing in Lake Borgne, and Louisiana boats from navigating channels of the lake and sound. Mississippi patrol boat has even been placed at the Lake Borgne end of the canal connecting the lake with Mississippi River, to prevent Louisiana boats from entering Lake Borgne.

Lake Borgne is an arm of the gulf. Its waters are salt. It is surrounded entirely, except at the outlet to the sound by Louisiana territory. The lake and the sound, like the Mississippi River, are navigable waterways of the United States.

Strange to say, the United States revenue cutter Winona has been doing patrol work in the waters of the lake and sound in the interest of Mississippi and the quarantine. I have protested to the Secretary of the Treasury and the Collector of Customs at Biloxi, Miss., and Mobile, under whose jurisdiction the Winona is.

I have taken vigorous steps to protect the rights of Louisiana fishermen in fishing in Lake Borgne and the waters of the lake and sound. I have protested to the Secretary of the Treasury and the Collector of Customs at Biloxi, Miss., and Mobile, under whose jurisdiction the Winona is.

VARDAMAN'S ADVICE.

The Times-Star has received the following advice from Gov. Vardaman of Mississippi concerning the clash between his State and Louisiana:

JACKSON (Miss.) Aug. 3.—The much-talked-of conflict between the States of Mississippi and Louisiana, so far as I know, is without justification in fact. If the quarreling guards of Mississippi have been guilty of indiscretion it has not been reported to me by the officers in charge of the guards, and I cannot believe that they have done anything wrong. I have instructed the guards to remain on Mississippi soil, and to be careful in the enforcement of the quarantine regulations promulgated by the Mississippi State Board of Health; not to do anything improper.

The intimation of an armed conflict between the States of Mississippi and Louisiana, whose friendship has been so cordial and of such long standing, is absolutely ridiculous to me. I shall not, under any circumstances, send any other Mississippi to violate the rights of Louisiana or her people, and I am sure the honorable Governor of Louisiana will reciprocate that sentiment.

JAMES K. VARDAMAN, Governor.

MUST SUPPRESS MOSQUITO.

WASHINGTON, Aug. 3.—The Public Health and Marine Hospital Service has issued a circular on the prevention of yellow fever. The directions given look to the suppression of the mosquito as the only means of preventing its spread. "No mosquito, no yellow fever," is the motto, in big black letters at the top of the circular.

The document continues as follows: "The infection of yellow fever is carried by mosquitoes and by no other means. Persons take the disease by being bitten by mosquitoes that have previously bitten a yellow-fever patient. The mosquitoes, to become infected, must bite a yellow-fever patient during the first three days of the attack. The first three days, therefore, of the most important period in the spread of infection. It is difficult to decide during the first three days whether a patient has yellow fever, hence, the necessity of threatening communities of placing a mosquito bar, immediately, around every patient who has fever of any kind, and for three days at least."

SHAW SEEKS LIGHT.

WASHINGTON, Aug. 3.—Secretary Shaw has received a telegram from Gov. Blanchard of Louisiana complaining of the action of the revenue cutter Winona in connection with the quarantine established by the State of Mississippi, and today sent the following reply:

"As authorized by law, revenue cutter Winona, has been detailed to assist in the quarantine of Louisiana boats in maintenance of quarantine established by the State of Mississippi. The State of Mississippi having established a quarantine, the act of Congress approved Feb. 15, 1893, has been violated; and if so, wherein."

The act of Congress referred to in the Secretary's telegram directed the Public Health and Marine Hospital Service, under the supervision of the Secretary of the Treasury, to see that health authorities in maintaining quarantine against infectious disease and clothes the Secretary with power to enforce quarantine regulations whenever, in his judgment, the public health requires it.

HAVE FEVER SYMPTOMS.

NEW YORK, Aug. 3.—Two persons with fever symptoms, two of them passengers and the remainder members of the crew, were received from the steamship Advance at Quarantine today and taken to Hoffman Island, the steamer came from Colon, having on board several employees connected with the Panama Canal.

This quarantine shuts off all communication between Houston and New Orleans, and prevents mail coming through directly.

BLANCHARD'S COMPLAINT.

CINCINNATI, Aug. 3.—The following dispatch from Gov. Blanchard of Louisiana has been received by the Times:

GENERAL MAYOR BELCHER. PATERNON (N. J.) Aug. 3.—[Exclusive Dispatch.] New facts were brought to light this afternoon, showing that Mayor Belcher has apparently been the victim of his own generosity. It is said that within the last two years he has loaned in cash and endorsed notes worth nearly \$100,000 which left him in financial straits.

POLICE CHASE ON THE LAKE.

SPECTACULAR GAMBLING RAID UNDERTAKEN AT CHICAGO.

Chief Collins Declares He Will Not Permit the Operation of the Floating Poolroom City of Traverse.

Muscleman Saves the Eagle from Capture.

(BY DIRECT WIRE TO THE TIMES.)

CHICAGO, Aug. 3.—[Exclusive Dispatch.] Gamblers, intent upon playing the races and poolroom determined to prevent all racketeering betting on the high seas furnished to day on Lake Michigan a unique and spectacular gambling raid. The police and gamblers raced around the lake, first into Michigan waters, then close to the shores of Illinois, and then into the jurisdiction of Indiana, the one seeking escape and the police determined to capture them at all hazards. The net results of the day for the police were the capture of fourteen weary marine gamblers, who floated ashore at South Chicago in a launch. All of the others, after a hot chase, escaped to Indiana Harbor, Ind., and made their way ashore outside of the jurisdiction of the Chicago police.

Chief of Police Collins said today that he would no longer permit the operation of the floating poolroom City of Traverse. He asserted that he would arrest all gamblers when they attempted to board it, claiming that they were about to commit an illegal act, which brought them within police jurisdiction. The gamblers circumvented the chief of police at the outset by causing the steamer City of Traverse to be run out into the lake into the waters of the State of Indiana, where they lay all through the morning. Large details of police were placed on the shore guarding approaches to all of the docks from which the gamblers might make their way to the lake. It was the expectation of the authorities that the betting fraternity would leave Chicago on the City of Traverse, but instead of this, a small steamer named The Eagle had been chartered, and the gamblers, walking past, the police, embarked and started for the City of Traverse, which was rolling around in mid-lake. The police were powerless to intercept the "accursed" boat, as they called themselves, and with deep chagrin watched them sail away to place their money on the races.

The announced programme of the managers of the floating poolroom was that all passengers would be landed at the foot of Ninety-second street in South Chicago, where the Calumet River empties into Lake Michigan. Chief Collins, balked in his attempt to prevent the sailing of the gamblers in the Eagle, transferred his forces to Ninety-second street, and posted them along the shore in such a manner that it would have been practically impossible for any man from the City of Traverse or the Eagle to set foot on shore and escape arrest. Late in the day, the Eagle steamed into the harbor at South Chicago, loaded with 300 men who were anxious to reach the shore. As soon as the boat was well inside of the first bridge, it was swung behind it. With escape to the lake cut off by the bridge, and no possible chance of a safe landing on shore, the case of the gamblers for a time looked desperate. The Eagle circled around and around in the harbor, tooting its whistle in frantic fashion for the bridge tender to turn the bridge and allow it to steam back into the lake. The police stood on the shore and laughed, feeling confident that it was only a question of time before the passengers of the Eagle would be in their power. A small, insignificant mud scow happened along at this critical moment, however, and blew its whistle as a signal for the bridge to open. The bridge tender was compelled to swing the bridge, and the Eagle, planting its bow squarely in the stern of the mud scow, crowded in closely as it passed through the bridge, and then made a run for the open lake and freedom.

As soon as the police discovered the approach of the mud scow and realized that the bridge must open, they made a rush for the freight Yosemite, and by the time the Eagle was entering the waters of the lake, the tug was tearing after it, loaded down with policemen.

The Eagle, however, steadily drew away from the tug, and after a run of ten minutes, the police gave up the chase. The Eagle landed at Indiana Harbor, its passengers returning to Chicago by train.

Before the arrival of the Eagle at South Chicago, a small launch named the Panther came in, bearing a number of gamblers from the City of Traverse and several fishermen. All the passengers of the Panther were lined up on the pier and compelled to stand in a heavy rain while the police searched the fishermen for the "excursionists." Fourteen men who could not prove that they had been fishing were loaded into the patrol wagon and carried to the police station.

The gamblers who returned to Chicago this evening declared that, even though the police had arrested all the passengers of the Eagle, they would have found it impossible to prove a case against them, as the wireless apparatus refused to work throughout the day, and not a message was received and not a bet was made.

NEW STORAGE BATTERY FOR AUTOMOBILES.

"Wizard" Edison to Send Vehicle Twenty Miles an Hour for One Hundred and Fifty Miles Under Favorable Conditions.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, Aug. 3.—[Exclusive Dispatch.] In announcing today that he had perfected his storage battery for propelling electric vehicles, Thomas A. Edison warmly complimented young Cooper Hewitt who had helped him solve the most difficult problem with his mercury rectifier. In talking about this latest triumph, Edison was careful to correct many exaggerated reports that have gone abroad concerning the invention.

His battery will not store enough electricity to drive an automobile at the rate of 35 miles an hour from New York to Philadelphia and back, but in the conservative estimation of the "Wizard," it will send the pleasure vehicle, under most favorable conditions, at a rate of 20 miles an hour for 150 miles.

Within a few weeks, Edison promises to begin work on a new factory, three stories high, 600x20 feet.

"With proper motor and wagon equipment, we can take our cells and operate an ordinary delivery wagon for 50 per cent of the cost of maintaining a horse," he said.

Edison was flushed with triumph at the successful termination of his long struggle to perfect this latest invention. He looked wan, but cheerful, and laughed gaily when he said he was determined to test for a few weeks. He said he was going to study birds and flowers, instead of dabbling with electric machinery in the workshop.

OPERATION ON WORKER.

SARATOGA, Aug. 3.—[Exclusive Dispatch.] Insular Workman, the New York banker, is lying at the United States Hospital, suffering from appendicitis. He has been operated upon today for appendicitis.

CROSS-COUNTRY RIDE.

NEW YORK TO OREGON.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, Aug. 3.—[Exclusive Dispatch.]

PITH OF NEWS FROM THE MIDDLE WEST.

(BY DIRECT WIRE TO THE TIMES.)

CHICAGO, Aug. 3.—[Exclusive Dispatch.] The real difficulty with Chicago weather, today, was in the extreme percentage of humidity. With a temperature range of from 68 to 77 degs., the city was an abode of comfort—on paper. With the relative humidity almost stationary at 82 degs., discomfort was most pronounced. Early in the day, the air became charged with the steaming moisture which came in contact with the cooling zephyrs from the lake, resulting in a series of ten-minute showers. Middle West temperatures:

JAP PLEADS FOR JAPS.

Masaji Miyakawa, L.D., the first Japanese lawyer admitted to the American bar, and who is a graduate of three American universities, in a lecture at the Illinois College of Law, tonight pleaded against the restriction of Japanese immigration. He said that despite the alarmist utterances of the labor agitators, it had taken thirty-eight years for the coming of 38,000 Japanese. He compared his countrymen favorably with the flood of immigrants pouring in from continental Europe at a rate some times as high as 12,000 daily.

WHAT KNIBBS THINKS.

J. W. Knibbs, Jr., the former Dartmouth football player, who is going west to coach the California varsity team this fall, figures that his greatest obstacle will be the lack of cold weather. "California," he said, "is all right for the tourists," he said, "but I don't see how you can run a team up and down the field a few times, just for wind, with summer garden weather prevailing. I'd like to see it snow out there."

HUNGRY REFUGEES SCARED.

(BY DIRECT WIRE TO THE TIMES.)

JONESBORO (Ark.) Aug. 3.—[Exclusive Dispatch.] Two thousand hungry refugees from Louisiana towns were held prisoners on a Cotton Belt train here, today, with the loaded rifles of militiamen pointed at them. They were weak from hunger, and made attempts to get to a railroad restaurant, but were stopped.

MYSTERY OF DOVE.

(BY DIRECT WIRE TO THE TIMES.)

CHICAGO, Aug. 3.—[Exclusive Dispatch.] Information has been secured by the police authorities of Chicago and Elgin that may end in unravelling the famous automobile mystery and bring about the arrest of "Dove" who shot and killed William Date, a chauffeur, whom he retained to take him to Joliet. For days, the police have been gathering evidence with which to catch the young man under suspicion, and confidence is expressed that "Dove" has been found.

WORK FOR CASSIE.

(BY DIRECT WIRE TO THE TIMES.)

CLEVELAND (O.) Aug. 3.—[Exclusive Dispatch.] It has been suggested that the authorities treat Mrs. Cassie Chadwick as the Michigan authorities did Frank Andrews, the Detroit bank-wrecker. Andrews said that he could not earn money to pay his victims, if locked up. He was released, and the first year he paid three hundred of his poorest creditors a total of \$150,000, and expects to wipe out a larger amount this year.

KANSAS WHEAT CROP.

(BY DIRECT WIRE TO THE TIMES.)

TOPEKA (Kas.) Aug. 3.—[Exclusive Dispatch.] Director T. B. Gerow of the State Employment Agency says it took 25,000 men from outside the State to harvest the wheat in 1904. It cost the farmers \$2,500,000 to harvest the crop. Practically all of this was spent in wages.

SLIPPED OFF CANDIDATE.

**Model Examiner Gave Out
Question Beforehand.**

**Complete Surprise in the Room
in the Investigation.**

**Charges Lodged
Against Dr. Dunn.**

THE ASSOCIATED PRESS—F.M.I.

SAN FRANCISCO, Aug. 3.—A com-

plete surprise was sprung in the in-

vestigation of the alleged irregular-

ities of the State Board of Ex-

amination when the "solid five"—A. B.

Howard, C. A. Herick, G. A. White,

C. Howard and F. G. Baird—

presented forward testimony which di-

rectly accused Dr. J. M. Dunn, one of

the examining factors in the board,

of giving out some of the questions

to a young man in his

room who was about to take the

exam, that he could apply for a

license.

The young man is Dr. Richard D.

Dunn, and he says in a sworn state-

ment that he was given three or

four questions by his employer, a

member of the State Board. To back

up his testimony, the "solid five" in-

vestigated before the examination

gave him these questions: A. B. How-

ard, C. A. Herick, G. A. White, C. How-

ard and F. G. Baird. The questions

were: "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

purpose of the examination?" "What

is the purpose of the examination?"

"What is the purpose of the examina-

tion?" "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

purpose of the examination?" "What

is the purpose of the examination?"

"What is the purpose of the examina-

tion?" "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

purpose of the examination?" "What

is the purpose of the examination?"

"What is the purpose of the examina-

tion?" "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

purpose of the examination?" "What

is the purpose of the examination?"

"What is the purpose of the examina-

tion?" "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

purpose of the examination?" "What

is the purpose of the examination?"

"What is the purpose of the examina-

tion?" "What is the purpose of the

examination?" "What is the purpose

of the examination?" "What is the

THROGS ATTEND SOO CELEBRATION.

**ADDRESS OF VICE-PRESIDENT
FAIRBANKS THE FEATURE.**

Pioneer White of the Upper Pen-

insula of Michigan Describes Mar-

velous Growth of Lake Traffic Since

Opening of Canal's First Lock,

Fifty Years Ago.

(BY THE ASSOCIATED PRESS—A.M.)

SAULT STE. MARIE (Mich.) Aug. 3.—

Commemoration exercises in the

government park here adjoining the

ship canal made up the second day's

programme of the semi-centennial cele-

bration of the opening of the St. Mary's

ship canal, which connects Lake Su-

perior with the lower lakes. The ex-

ercises took the form of a programme

of addresses, the feature of which was

an address by Vice-President Fair-

banks.

A concert by the Calumet and Mecla

bands at 9 o'clock, opened the exer-

cises. The park was well filled before

the music began and its conclusion

the grounds were crowded with thou-

sands of people.

Archdeacon Lord of Sault Ste. Marie

opened the exercises with an invocation

and Hon. Charles J. Osborne of

this city followed with an address of

welcome.

Second in importance, perhaps, to the

address of the Vice President was that

made by Hon. Peter White of Mar-

quette, president of the commission

which has been in charge of the cele-

bration and the canal's widely known

man in the upper peninsula of Michi-

gan. His topic was the "Development

of Lake Superior Region."

Mr. White is a pioneer in the upper

peninsula and is an authority on the

history of that part of the State and

its development from an unexplored

wilderness to its present importance

as a mining center. Mr. White de-

scribed the developments of the min-

ing industry in the upper peninsula

at the marvelous growth of the lake

marine traffic since the opening of the

St. 350-foot lock here, fifty years ago.

The commemoration exercises were so

lengthy that they were divided into

a morning and afternoon programme,

the speakers and distinguished guests

being entertained during the interval

at luncheon at the Sault de Ste. Marie

Club.

OBITUARY.

James R. Carnahan.

INDIANAPOLIS (Ind.) Aug. 3.—

James R. Carnahan, major-general of

the Uniform Rank, Knights of Pythias,

died today at his home in Woodruff

Place, after an illness of two weeks.

The cause of death was stomach trou-

ble. James R. Carnahan was born at

Dayton, Ind., November 18, 1841. Join-

ing the Knights of Pythias in 1874, he

founded the Uniform Rank, and was

selected its first major-general, in 1884,

which position he held ever since.

He leaves a widow and three daugh-

ters. Mrs. H. G. Ashbrook of Cleve-

land, Mrs. Michael Stebbins of Super-

ior, Wis., and Mrs. Ralph Hess of Fort

Collins, Colo.

JUMPS FROM A STEAMER.

FRESNO, Aug. 3.—A private dis-

patch from Eureka, received here to-

day states that Walter Berry, a son

of the late James Berry, jumped

from a steamer. James Berry was a

prominent lumber man who was killed

UNTAIN RUSH ENDS.

Not Much Doing in Colorado and Clerks are Relieved—Veterans Endangered by Red Taps.

BY THE ASSOCIATED PRESS.—A.M. GRAND JUNCTION (Col.) Aug. 3.—The Uintah registration rush in this city apparently is at an end. Only about five hundred homeseekers came in on today's train. Three of the regular clerks were relieved from duty today and ordered to report to A. W. Richards, Land Commissioner, at Provo, Utah.

Mayor L. N. Dunning and the Chamber of Commerce have telegraphed to Commissioner Richards, asking him to change the ruling rejecting registration applicants of veterans on blanks not furnished by the government. Five hundred veterans in Eastern States who have used such blanks. It is asserted, will not have time to secure and file the government blanks before the close of registration.

From Copenhagen the German Imperial yacht Hohenzollern, with Emperor William on board, sailed yesterday for Samnia, Pomerania.

SWEDEN FEELS HER DUTY DONE.

After Offer Made to Norway, if Breach Occurs Now, Oscar is Absolved from Blame.

(BY THE ASSOCIATED PRESS.—A.M.) STOCKHOLM, Aug. 3.—[By Atlantic Cable.] The extraordinary session of the Riksdag was brought to a close today. King Oscar was not present, but was represented by the new Premier, Christian Lundberg. In declaring the session closed the speaker of the Lower House said the situation contained disquieting elements, but Sweden would be absolved from blame if a breach occurred, after the offer made by the Riksdag. Another special session will be called as soon as Norway is ready to act on the Swedish conditions.

King Oscar, who was recently created a German admiral by Emperor William, today visited the German squadron, which arrived here last night. His Majesty gave a fete to-night in honor of the squadron.

FAMILY WITH SYNTHESIA.

BALTIMORE, Aug. 3.—[Exclusive Dispatch.] Dr. Henry Lee Smith, clinical assistant of Johns Hopkins Hospital, announces today the presence in this city of a remarkable case of a synthesia, found in the family of a clergyman who is afflicted, together with his children, three sons and two daughters. The synthesia is described by scientists as a disease which causes correlation in the mind between the sound of words and colors, resulting in production of colors before the eyes when certain words or letters are uttered.

NEW FEDERAL OFFICERS.

WASHINGTON, Aug. 3.—The President has appointed William R. Moore register and F. R. Hildreth receiver of the Consolidated Land Office at Phoenix, Ariz. Moore was register of the office at Prescott and Hildreth at the Tucson office before the three offices were merged.

WILD ZURLO DEFIES LAW.

**Beats Poor Little Wife and is
Besieged.**

**Tale of Bloody Murder from
Neighbors.**

**Ways and Means Committee
Finally Chosen.**

Through firing a revolver either at his wife or for the purpose of intimidating her after beating her almost into insensibility, Domenico Zurlo, a shoemaker, residing at No. 825 Parker Drive, succeeded not only in quieting his wife, but was responsible for a story of murder being breathlessly telephoned to police headquarters at 2 o'clock last night.

When Officers Lusk and Benedict arrived, hot foot to apprehend the murderer and Bartlett and Pollock buzzed up in the electric ambulance to bear away the remains of the woman, they found the Zurlo household very much alive, and prepared to meet them in a stage of armed rage.

Immediately after the firing of the shot following upon the screams of his wife as he chased her about the house beating her while she hugged her nine-month-old babe in her arms to protect it from the insane fury of the father, Zurlo locked windows and doors and dared the police to enter his citadel.

A consultation of war was held outside by the shooting of a bullet into a hundred neighbors in the safe back-ground acting as an advisory board.

"Batter the door down and drag him out, the ugly brute," recommended the little lady crouched behind a rose bush in the front yard of George Brooks, next door to the house where the corpse was supposed to be weltering in blood.

"You shall neither, neither come in," called Zurlo, threatening through the glass of the front door.

"Where is the dead woman?" demanded the officers.

"Sacre, here she lies," returned Zurlo, diving into a rear room and dragging out a pretty little woman of 30 years or thereabouts, and exhibiting her before the officers apparently unhurt, save that she appeared panic-stricken, and in her terror said over a word.

Zurlo to all the demands to open the door and come out and be arrested. Zurlo only shook his bushy black whiskers savagely and repeated "Neffter" with such a lurking threat behind it all that no one doubted that a real tragedy would have followed upon the beating in of the door, even had the officers felt justified in adopting such summary means to apprehend the disturber of the neighborhood quiet.

The police then attempted to prevail upon the neighbors to appear today and file a complaint of disturbing the peace against Zurlo, the more so that they charge that Zurlo's abuse of his wife is a matter of frequent occurrence. But the residents thereabout emphatically declined to identify themselves in any such movement, declaring themselves to be wholesomely afraid of Zurlo.

The police satisfying themselves that the woman had not been shot, departed, leaving Zurlo victorious in his cocked house and deaf to all importunities to come out and explain his noisy and startling method of preserving quiet and calm in his household.

Then the neighborhood tucked its skirts around its slippers and sat upon its front porch to relate to universal condemnation the man who has recently purchased the property at No. 825, and who is now to all intents a fixture among them.

Called that his wife-beating is a regular form of amusement with him that he has indulged ever since the little woman came out from Italy two years ago to marry him here. They have no visitors and the wife speaks no English, nor has had any opportunity of mingling with her neighbors to learn the language of her adopted country, immersed as she is within the confines of her own house.

A committee of ways and means with M. D. Woods of No. 818 Parker Drive was finally elected to consider the advisability of entering complaint against Zurlo for disturbing the peace.

CARLSON'S CASE BLACK.
EVIDENCE OF ALL SORTS.
(BY DIRECT WIRE TO THE TIMES.)
NEW YORK, Aug. 3.—(Exclusive Dispatch.) Inspector Adam Cross, who is investigating the charges against Frederick Carlson, the alleged poisoner, self-confessed multibillionaire and thief, today declared that evidence had already been secured to put Carlson behind the bars for the rest of his natural life.

"Leaving out the charges of wife poisoning," said Cross, "Carlson has confessed to enough bigamy charges and other crimes to put him away for forty-eight years, which is practically a life sentence. The evidence in three bigamy cases, one of larceny, and one highway robbery charge is overwhelming. But we have not given up hope, by any means, of sending this remarkable criminal to the chair."

Burglars Make Rich haul.
SAN FRANCISCO, Aug. 3.—During the absence of the family, burglars entered the residence of J. Whitman, 609 Buena Vista, and secured a large quantity of jewelry valued at between \$1000 and \$1500.

Abducting Teller Pleads Guilty.
DULUTH (Minn.), Aug. 3.—A. B. Leutenheimer, abducting teller of the First National Bank of this city, pleaded guilty in the Federal Court here today and was sentenced to five years in the penitentiary.

Doctor Held for Girl's Death.
SAN FRANCISCO, Aug. 3.—The coroner's jury impelled to investigate the death of Gladys Cunningham of San Jose, Federal Court here today returned a verdict holding Dr. Frank Thomas, in whose office Miss Cunningham died, responsible for her death.

Mrs. Tortoriel May Go to Mother.
SAN FRANCISCO, Aug. 3.—Mrs. Rosa Tortoriel, wife of Tortoriel, here fugitive accused of the murder of Biaggio Vilarde, will be permitted to depart from California and take up her residence with her mother at Independence, La. This has been determined by Judge Lawlor after a conference with District Attorney Brington and the woman's attorney, Mrs. Tortoriel has promised to make a written report of herself every two weeks.

WOULD FILL THE JAIL.

**Modest Request of Irate Bicycle Dealer
That Half a Hundred Boys be
Locked up.**

Nathan Schlessman, who runs a bicycle store at No. 148 Commercial street, wants fifty boys arrested. They are Edwin Williamson and forty-nine young John Does.

The irate bicycle dealer explained to the police that Williamson came to his place last night, accompanied by the Mormon-like Don family and demanded back the purchase price of a wheel which has an alleged penchant for breaking down. Naturally Schlessman declined to give good money for an admittedly bad wheel, and unpleasantness ensued.

Williamson and as many Does as could crowd into the shop, with the rest crowding the sidewalk and making the place look like an auction sale of a collection of second-hand junk, began to speak to the bicycle man in terms never learned at Sunday-school.

It was shocking to the wheel man, and he fled in dismay. The youngsters fled in the same direction, and their wild and speed being good, they continued to pour into the ears of the less man a stream of abuse which, combined with the spectacular features of the situation, made him feel painfully conspicuous in the eyes of the revolving public. For this he wants fifty cells filled in the City Jail, but if he has erred in his count he has no objection to making it a dozen more.

PERCY PEACHES ON HIS PALS.

**YOUTHFUL HOLD-UP CONFESSES
TO OAKLAND CRIME.**

**Four Boys Deliberately Planned to
Waylay Their Friend and Acquaintance,
Cook, Who Subsequently Died
from Blows Rained Upon Him With
Lead Pipe Bludgeons.**

(BY THE ASSOCIATED PRESS-P.M.)
OAKLAND, Aug. 3.—Percy Pembroke, one of the trio of boys who were under arrest charged with the murder of T. W. Cook, has made a full confession. In his cell today the sixteen-year-old boy broke down and told Sheriff Barnett the full story of the crime.

Three boys, all under 17 years of age, deliberately planned to hold up their friend and acquaintance, Thomas W. Cook. They lay in wait for him, armed with bludgeons of lead pipe. When Cook appeared, Pembroke declared, Stephen Blaker stopped him and dealt him a stunning blow with the pipe. Cook fell and Pembroke ran from the scene of the crime, leaving the companions, John Schneider and Blaker, to complete the robbery. Pembroke exonerates Crowhurst, another of the suspects.

Last night, Sheriff Perry White telephoned to Sheriff Barnett that he thought Pembroke was ready to confess. White and Constable Tom Carroll of Fruitvale had been subjecting young Pembroke to a severe cross-examination for some time previous, but it was not until almost five hours later that Pembroke confessed. His first want to know how he might turn State's evidence but Sheriff Barnett told him that his confession he had made must be without any promise of reward or favor.

Today, Blaker and Schneider were confronted with Pembroke in the presence of District Attorney Allen and Sheriff Barnett, and Pembroke's confession was then read to them. Sheriff Barnett asked Schneider if there were any statements in it not true, and the boy answered: "No." When the boy was asked to sign the confession he said: "I can't answer."

Sheriff Barnett states that probably no formal charge will be lodged until after the inquest, which will be held on Saturday.

POSSE SHOTS NEGRO.

**HAD KILLED TWO PERSONS.
(BY THE ASSOCIATED PRESS-P.M.)**

LEWISVILLE (Ark.) Aug. 3.—After killing two persons, seriously and probably fatally shooting two others and slightly wounding two more, the Kinney, a desperate negro, was killed in a river bottom at Doella, six miles south of Lewisville at noon today, after a hot fight with a posse of citizens that had surrounded him.

Kinney killed a negro at Stampon, Wednesday, and while being pursued by a posse, shot and killed E. R. Ferguson. At 3 o'clock this morning, three miles from Lewisville, the negro met Mr. J. A. Stewart of Gretna and immediately began firing. After shooting and seriously wounding both, the posse members of a posse, and assured them he was very sorry that he had fired on them. Later this morning, about twenty-five men with dogs started on Kinney's trail. A few members of the search party finally located Kinney in a bottom near Doella, a plantation possession. As soon as the posse had arrived and begun to close in on the negro, he opened fire. C. F. Nash lost his finger, when he found that he was through the neck and seriously wounded. Then W. C. Nash sent a bullet into the negro and he tumbled over dead.

Fifteen hundred dollars had been offered for the capture of Kinney, dead or alive.

SANTA BARBARA.

**FIRE IN A HOTEL.
(SPECIAL CORRESPONDENCE OF THE TIMES.)**

SANTA BARBARA, Aug. 3.—Fire broke out in the third story of the New Morris Hotel about 10 o'clock this morning. The fire was discovered by C. F. Stebbins, proprietor of the hotel, who, when he found that he could not extinguish it without assistance, shut up the room and sent in an alarm.

When the firemen arrived they turned three stories into the room and succeeded in preventing a spread of the flames. The fire was started from a fugitive in the room. The loss will be about \$1000.

AUTOMOBILE TOURISTS.

Mr. and Mrs. E. Lynch, and son O. A. Lynch, J. P. Kennedy, and W. J. Heston, of San Francisco, have arrived in the city, having come down the coast in Mr. Lynch's touring car. They left that city Sunday morning. They will remain here a week before going to Los Angeles.

SANTA BARBARA BRIEFS.

The City Council in the committee of the whole considered the new license ordinance that is being drafted. There has been no general license law in this city and it has been decided to incorporate an ordinance that will place a high license on objectionable businesses, but will not be a burden to other business houses. The license rates were agreed upon last night and will be drafted and presented as an ordinance at the next meeting of the Council.

Miss Emma D. Langham and Lloyd G. Burnstead of Ontario, were united in marriage yesterday afternoon at the home of the bride's parents, Mr. and Mrs. H. Langham, of Goleta.

GRIEF OF CUPID IN COCHISE.

**MANY DIVORCE APPLICATIONS IN
THAT COUNTY.**

Most of the Cases are from Bisbee and are Sued for by Miners or Miners' Wives—One Drugged Out of Husband Shoots Another Woman by Mistake.

(SPECIAL CORRESPONDENCE OF THE TIMES)
TUCSON (Ariz.) Aug. 3.—Cochise county, according to the court records, has more divorce and more domestic infelicity than any other subdivision of the territory. It is a dull court session that opens at Tombstone without at least fifty applicants for divorce, most of them being from Bisbee and sued for by miners or miners' wives. At the last term of court in Tombstone Mrs. Ray Whitteley secured a divorce from her husband, a Bisbee miner, and was awarded the custody of her children. The chief trouble in the household appeared to have been the inordinate jealousy of the husband.

Since the divorce, Whitteley has been acting as if deranged. The wife had been staying at the home of Mrs. Robert Engle. Whitteley called at the Engle house. When the door was opened, he produced a revolver and shot point blank at the woman in the hallway, thinking her his wife, but it was Mrs. Engle. The bullet passed through her arm, making only a slight wound. Whitteley continued shooting through the door, till dropped by a pot shot from J. H. Resinger, a cousin of the divorced woman, who had secured a point of vantage in a window overlooking the porch.

The bullet passed through Whitteley's body near the shoulder, making a wound that may possibly prove fatal. But, though undoubtedly suffering terrible pain, the miner continued to shoot viciously through the door of the house until he had emptied his revolver.

REFORMER IN GRIEF.

A spasm of reform has struck the mining camp of Clifton wherein orders have been issued that women shall not be permitted to visit the saloons. A leader in the reform movement was O. R. Risdon, a photographer, who has attained the usual reward of a reformer and is now in bed suffering from severe injuries at the hands of an enraged saloon keeper, Jesse Dunigan. The saloons are those into which it was charged that the women had been taking had been taken by their Clifton parents. Dunigan was a deputy sheriff at the time and a strong witness against the saloons before hearing in the Territorial Supreme Court.

TERRITORIAL SHORT ITEMS.
Yesterday Bisbee laid the corner stone of her new \$75,000 school building. The bonds for the necessary amount were taken by the Bank of Bisbee. The exercises included hymns and songs by the school children and addresses by the Mayor and a number of prominent citizens.

Reports from Sonora tell that so many workmen have been taken by the mines that hardly any help can be found to invest the crops. The situation has not been a good one at least and now the crops that have been raised must rot upon the ground for lack of reapers. The only solution of the difficulty appears to be the importation of Chinese.

It would appear that Mexico is becoming disaffected with the national beverage. The congress of the state of Sonora has approved a contract lately entered into between the governor and J. Jahn who will establish a whiskey distillery in Sonora under a concession of five years exemption from all taxes.

Bisbee's City Council has passed a winerium ordinance, in consequence of which all back rooms of the saloons in the city have been closed for a while. Two years ago a fellow named Hardy, who had been peeping through windows in Tucson, accepted the advice of the police and left for other parts. Hardy has returned and now is lodged in the County Jail charged with the same old offense. In one of his peeping excursions he narrowly escaped death at the hands of A. M. Rockwell, who mistook a reasonably good opportunity with a shotgun.

Mrs. Eva Ring has returned to Tucson with her 17-year-old daughter who had been spirited away to Long Beach, Cal., by her father, from whom her mother had been divorced several years before.

At Tombstone, Honora B. English has been divorced from Alton R. English. The latter a prominent Democratic politician and capitalist, owing considerable property in Tucson.

J. S. Massey, a contractor on the southwestern road, has filed a petition in bankruptcy. The excess of debts over assets is claimed to be only about \$1000. His present creditors are in a state of confusion.

Tucson, Bisbee, Douglas, and all electric lighted towns in southern Arizona are suffering from a shortage of gas. Gas is scarce and expensive.

In preparation for handling the coal business that will come through the construction of the coast line between the Dawson gold fields and the Northwestern railroad, Phelps, Dodge & Co. have ordered for a new mine with capacity for 100,000 tons each.

SUED BY FOSTER SISTER.

**Monrovia Man Must Defend Himself in
Legal Action Begun Against Him
at Pittsburgh.**

Oscar A. Whitaker of Monrovia will be called upon to defend himself in a civil suit filed against him yesterday at Pittsburgh by Isabella Whitaker, his foster sister, in which she asks that a foreign attachment issue against him. In a dispatch to The Times from that city last night it is stated that Miss Whitaker alleges that Oscar was left his mother's money, all save \$500 which she, as foster child, was to get when she became 18 years of age. At that time Oscar was to feed, clothe and educate her. She alleges he did nothing but throw her out of his house. She claims that he has since then been living in a state of luxury and has been making money which she alleges should now amount to \$1775.

Small pitchers 10c, 12c, 15c, 18c, 20c, 25c, 30c, 35c, 40c, 45c, 50c, 55c, 60c, 65c, 70c, 75c, 80c, 85c, 90c, 95c, 1.00, 1.25, 1.50, 1.75, 2.00, 2.25, 2.50, 2.75, 3.00, 3.25, 3.50, 3.75, 4.00, 4.25, 4.50, 4.75, 5.00, 5.25, 5.50, 5.75, 6.00, 6.25, 6.50, 6.75, 7.00, 7.25, 7.50, 7.75, 8.00, 8.25, 8.50, 8.75, 9.00, 9.25, 9.50, 9.75, 10.00, 10.25, 10.50, 10.75, 11.00, 11.25, 11.50, 11.75, 12.00, 12.25, 12.50, 12.75, 13.00, 13.25, 13.50, 13.75, 14.00, 14.25, 14.50, 14.75, 15.00, 15.25, 15.50, 15.75, 16.00, 16.25, 16.50, 16.75, 17.00, 17.25, 17.50, 17.75, 18.00, 18.25, 18.50, 18.75, 19.00, 19.25, 19.50, 19.75, 20.00, 20.25, 20.50, 20.75, 21.00, 21.25, 21.50, 21.75, 22.00, 22.25, 22.50, 22.75, 23.00, 23.25, 23.50, 23.75, 24.00, 24.25, 24.50, 24.75, 25.00, 25.25, 25.50, 25.75, 26.00, 26.25, 26.50, 26.75, 27.00, 27.25, 27.50, 27.75, 28.00, 28.25, 28.50, 28.75, 29.00, 29.25, 29.50, 29.75, 30.00, 30.25, 30.50, 30.75, 31.00, 31.25, 31.50, 31.75, 32.00, 32.25, 32.50, 32.75, 33.00, 33.25, 33.50, 33.75, 34.00, 34.25, 34.50, 34.75, 35.00, 35.25, 35.50, 35.75, 36.00, 36.25, 36.50, 36.75, 37.00, 37.25, 37.50, 37.75, 38.00, 38.25, 38.50, 38.75, 39.00, 39.25, 39.50, 39.75, 40.00, 40.25, 40.50, 40.75, 41.00, 41.25, 41.50, 41.75, 42.00, 42.25, 42.50, 42.75, 43.00, 43.25, 43.50, 43.75, 44.00, 44.25, 44.50, 44.75, 45.00, 45.25, 45.50, 45.75, 46.00, 46.25, 46.50, 46.75, 47.00, 47.25, 47.50, 47.75, 48.00, 48.25, 48.50, 48.75, 49.00, 49.25, 49.50, 49.75, 50.00, 50.25, 50.50, 50.75, 51.00, 51.25, 51.50, 51.75, 52.00, 52.25, 52.50, 52.75, 53.00, 53.25, 53.50, 53.75, 54.00, 54.25, 54.50, 54.75, 55.00, 55.25, 55.50, 55.75, 56.00, 56.25, 56.50, 56.75, 57.00, 57.25, 57.50, 57.75, 58.00, 58.25, 58.50, 58.75, 59.00, 59.25, 59.50, 59.75, 60.00, 60.25, 60.50, 60.75, 61.00, 61.25, 61.50, 61.75, 62.00, 62.25, 62.50, 62.75, 63.00, 63.25, 63.50, 63.75, 64.00, 64.25, 64.50, 64.75, 65.00, 65.25, 65.50, 65.75, 66.00, 66.25, 66.50, 66.75, 67.00, 67.25, 67.50, 67.75, 68.00, 68.25, 68.50, 68.75, 69.00, 69.25, 69.50, 69.75, 70.00, 70.25, 70.50, 70.75, 71.00, 71.25, 71.50, 71.75, 72.00, 72.25, 72.50, 72.75, 73.00, 73.25, 73.50, 73.75, 74.00, 74.25, 74.50, 74.75, 75.00, 75.25, 75.50, 75.75, 76.00, 76.25, 76.50, 76.75, 77.00, 77.25, 77.50, 77.75, 78.00, 78.25, 78.50, 78.75, 79.00, 79.25, 79.50, 79.75, 80.00, 80.25, 80.50, 80.75, 81.00, 81.25, 81.50, 81.75, 82.00, 82.25, 82.50, 82.75, 83.00, 83.25, 83.50, 83.75, 84.00, 84.25, 84.50, 84.75, 85.00, 85.25, 85.50, 85.75, 86.00, 86.25, 86.50, 86.75, 87.00, 87.25, 87.50, 87.75, 88.00, 88.25, 88.50, 88.75, 89.00, 89.25, 89.50, 89.75, 90.00, 90.25, 90.50, 90.75, 91.00, 91.25, 91.50, 91.75, 92.00, 92.25, 92.50, 92.75, 93.00, 93.25, 93.50, 93.7

GARBAGE MAN GRILLED AGAIN.

Health Board Scents Grab on Hospital Work.

Says Money is Paid for Collections Never Made.

"Pizen" Cry on Patent Medicine of Rich Returns.

Is the City Council assisting the city garbage collector to steal \$450 a month from the city?

This was virtually the question propounded last night by the Board of Health.

The usual report against the shortcomings of the garbage man was made and the usual fines imposed.

"Of course they'll be revoked by the Council," said a member of the board.

Dr. Kurtz called the board's attention to the fact that the garbage collector—misnomer—receives a special \$450 a month to collect garbage from the hospitals.

"I know that he never collects it at the hospitals. They have to hire a special man to do it."

Dr. Manning mentioned another hospital where no garbage is collected and where the owners of the hospital are obliged to have it taken away by private contract.

"Suppose me that if he gets \$450 for taking garbage from hospitals and then don't take it, he has something of a snap," said Dr. Kurtz, grimly.

Dr. Manning, cynically: "Oh, he is not getting that \$450 to collect any garbage. The Council merely gives him that to get even with us. They'll even give him his fines back if we impose any."

There are streets in the city down which the garbage man has not been allowed to go for months, his excuse being that the contract with the city does not compel him to go to ungraded streets. Although these streets are graded and accepted, his excuse is that he might have to go down ungraded streets to get to the graded streets. Meanwhile the city pays the money and the public health can go to the devil.

"LIQUORONE" ON CARPET.

Liquorone, the patent medicine which is reputed to net its manufacturers a paltry profit of 75,000 per cent. on each gallon, also was on trial before the Board of Health, accused of "poisoning" the public. Its cost is said to be one cent per gallon; selling price, 75¢.

The reply of Liquorone contained a veiled, but stinging retort.

Attention of the board was called to a State law which for twenty-five years has required druggists to label "Poison" on all drugs containing nux vomica, sulphuric acid and various other substances contained in many patent medicines.

This, of course, never has been observed. The representative of Liquorone pointed out that such an enforcement would throw out half the patent medicines on the market.

W. H. Johnson, a Chicago lawyer, who is one of the stockholders in the concern, appeared for the medicine. He moved the board to the highest emotion by telling how one of his five children was taken sick with a malady that stumped all the Chicago doctors, and was cured by Liquorone.

He admitted, however, that perhaps the advertisement writer of their concern might be a trifle exuberant in his claims for the cure-all properties of the medicine which the City Chemist's report shows to contain one-half drop of sulphuric acid to each spoonful.

Mr. Johnson stated that the sales of the medicine amount to 4,000,000 bottles a year. He offered to send out instructions with each bottle limiting the number of doses to eight a day, the board's objection being mainly directed at the danger of unlimited doses being permitted by the directions.

The case has now gone into the courts in San Francisco, owing to the attempt of the San Francisco Board of Health to limit its sale except under certain restrictions as to label. Johnson contends that all the board can do is to prosecute in case the law is violated.

"What we ought to have," said Dr. Pellette, "is a law against all patent medicines. The best life insurance companies now ask each applicant if he is in the habit of taking patent medicines. I am an examiner for a company which consider a patent medicine taker a bad risk."

HEN RESTRICTIONS.

The board recommended an ordinance to the Council forbidding hens to wander off their own premises, or to have their place of abode within twenty feet of any door or window in a dwelling.

An ordinance regulating the mixing of preservatives in human food also was recommended.

USEFUL WOMEN SEEK BROKERS.

NEW YORK, Aug. 3.—J. H. Mansfield & Co., a brokerage firm, said to have been without exchange connections, which occupied a handsome suite in the New York City office building, has suspended, and anxious creditors besieged the place yesterday, seeking some explanation. No member of the firm could be found. The only consolation was a placard on the door reading: "Business temporarily suspended; will resume in a few days." According to the firm's letter-heads, the concern was incorporated with a capital of \$100,000. It had been in business only six months, and catered largely to women, many of whom gathered about the closed rooms and stared ruefully at the notice of suspension.

NOT ENCOURAGING EMIGRATION.

NEW YORK, Aug. 3.—Baron Von Hugel, the Austro-Hungarian Ambassador, who arrived yesterday from Europe, denies that Austria-Hungary is encouraging emigration to the United States. "There is a scarcity instead of a surplus of unskilled labor in Austria-Hungary," said he, "and farmers are having great difficulty in getting enough help to harvest their crops. There was an abundance of such labor, but emigration has changed the situation entirely. Wages for unskilled labor have advanced so that they are now as high, practically, as in America, and there is no object for laborers to leave their native land."

ELEVEN-INCH GUNS.

NEW YORK, Aug. 3.—Following the recent announcement, the intermediate-guns of warships would be abolished in the near future, news has come to Brooklyn Navy Yard that a new eleven-inch gun is likely to be made. This gun will be necessitated by the fact that new battleships will not have weight enough to permit all of the big guns to be of twelve-inch caliber.

DROWNED IN THE MERCED.

Sad Fate of East Side Young Girl Gone for a Summer Outing With Sick Parents.

Miss Mary G. Garrigan, eldest daughter of Mr. and Mrs. J. E. Garrigan, well-known residents of the East Side, was drowned yesterday in the Merced River, where the Garrigan family was camping on a summer's outing.

Only meager particulars have been received here, but it is understood that a man who attempted to rescue Miss Garrigan from the river also perished. The body will be brought to Los Angeles for interment, and services will be held in the church of the Sacred Heart, of which she was a member.

Th Garrigans have lived five years at No. 143 North Griffin avenue. The family consisted of parents and six children. Mary, who was 16, had attended the Academy of the Sacred Heart, on South Sichel street, for the past four years, and graduated there with honors only last June. She was a remarkably bright and attractive girl, and had special talent in music. It was her intention to enter some college in the fall to pursue her studies, and fit herself for the profession of teaching.

Mr. and Mrs. Garrigan have been in ill-health a year, and they left East Los Angeles early in June, with all the children but Mary, for an over-land trip. She remained here until after graduating, and then joined them at Santa Barbara. They traveled by team, and intended to spend the summer in this manner.

Miss Mary was a member of the Young Ladies' Sodality of Sacred Heart parish, and a great favorite among the young people of that community. Both parents are prostrated by the tragedy.

MINES AND MINING.

PROSPERITY IN OLD PIOCHE.

NORTHERN LINCOLN COUNTY IS BEING DEVELOPED.

Railroad to be Built to Caliente to Connect With Salt Lake—No Boom Coming, but Steady, Substantial Growth—Boston and Utah Companies to Do Big Things.

"The next year will witness an enormous growth in the mining industry in the old Pioche district. There will be no boom, however, but slow, steady and substantial development; work that brings positive and lasting results. Pioche is one of the great districts of the early days that is now being revived after years of abandonment, and its future is very bright."

This was the statement of Charles S. Miller of Boston, president of the Boston and Pioche Mining and Development Company, who is at the Van Nuys, after a visit to the properties of his company in northern Lincoln county. He is of the opinion that the opening of the Salt Lake Railroad means a great deal for Nevada, and for Lincoln county, in particular.

"Pioche is one of the greatest of the early camps," continued Mr. Miller. "During the mining boom that followed the opening of the Comstock lode mine the Raymond produced \$2,000,000, until the period of depression came, the price of silver fell and the mines finally shut down. But while this great wealth was produced there was no attempt made to handle any but the highest grade of ore. The conditions would not permit the profitable working of the lower grades, and great bodies were left that can be profitably worked by modern methods. The stocks of the old Raymond mine were handed extensively on the San Francisco exchange during the Comstock days, and brought big prices. I verified the figures as to production from the records of the mine. Workings were down 1400 feet."

DEVELOPMENT STARTED.

"The Nevada-Utah Mining and Development Company, a \$15,000,000 corporation, has taken hold and is preparing to do extensive work on this famous old mine. Its work is in charge of Col. John Weir, who was in charge of the Guggenheim smelting interests in Mexico for years. Five engineers are now at work preparing plans for large surface and underground workings, and by October the company will be employing a large number of men. A railroad will be put in from Caliente to Pioche to connect with the Salt Lake."

"A comparison shows that there is everything to show that the ore body is larger and richer and much easier to work than that at Bingham, Utah."

"The Boston and Pioche Company will expend half a million dollars within the next year developing its property, which adjoins the Nevada-Utah, lying both east and west of the latter mine. A tunnel is being run, and we will also sink a shaft, perhaps two."

"The whole camp is taking on new life, old mines are being cleared out, and retimbered and started again after years of idleness. A number of power plants and mills are likely to be put in, and probably some new mines will be opened. This development means much to that district. It is one of the many cases of the revival of western enterprises by the golden touch of eastern capital."

Announcement of such development at Pioche coupled with the news published a few days since of the new riches just uncovered in the famous Delamar mine goes to show that Lincoln county's future is by no means confined to the southern border.

PROSPECTING IN OAXACA.

Prof. W. L. Watts, well known in Los Angeles, is now in Oaxaca on an expedition undertaken on behalf of the Los Angeles Exploration and Development Company. This corporation was organized a few months since to search for the "treasures of Montezuma," or any others that might be lying around Southern Mexico, and the professor was dispatched to Oaxaca, where he now makes his headquarters, and makes trips to all parts of the surrounding territory. Among those interested in the company are C. A. Campbell, E. L. Doherty, C. White Mortimer, A. B. McCutcheon, Dr. West Hughes, J. V. Dunsiger and others.

RED RAVEN'S NEW MANAGER.

Frank M. Curtis has managed and developed the famous Queen Esther mine of Mojave from a prospect to one of the best properties in Kern county, has been chosen superintendent of the Red Raven mine owned by Los Angeles and located in El Dorado county. He is now in San Francisco purchasing an engine and boiler for installing steam power for the company's 20-stamp mill which is to be running within thirty days according to the company's calculations. The steam plant will be an auxiliary and will be power used when available, which is during most of the year.

The mine is a tunnel proposition reported to have one forty-foot ledge of \$5 ore and an eight-foot one of \$20 rock. Prior to its purchase by Los Angeles it was worked with an arrastra for years and there are 700 feet of tunnels all said to have been driven by money derived from the mine as work progressed.

BIG ARIZONA DEALS.

SALES RECENTLY MADE.

PHOENIX (Ariz.) Aug. 2.—Twenty SPECIAL CONSIDERATIONS OF THE PROPERTY claims belonging to H. W. Clark, H. C. Hitchcock, Charles T. Martin and W. H. Stuart, located east of the Globe townsite have been bonded to T. D. Morris for \$120,000.

The Florence Smelting Company is to put up a furnace within the next few months at Price's siding, on the north side of the Gila River, east of Florence. The initial capacity is to be 100 tons of ore per day.

A twenty-stamp mill and a complete cyaniding plant are being placed on the property of the White Gold Company, near Wickenburg.

It is claimed that as a result of the visit of stockholders of the Mormon Girl mine, north of Phoenix, two water-jacket furnaces will be erected on Cave Creek to handle eighty tons a day of the ores of the property.

A fifty-ton milling plant with cyanide annex is being erected on the Golden Crown mine in the southwestern part of Yavapai county.

The Iron King smelter, below Jerome, is to be shut down for an indefinite period. No explanation has been given by the representatives of Senator Clark who owns the property. It has a large body of sulphide ore, but is handicapped by the wagon haul to Jerome.

A fifty-ton concentrator and reverberatory furnace are to be placed at once on the claims of the Bonney Company, near Lordsburg.

Superintendent Pattison of the Shattuck-Arizona mine at Bisbee, states that he has tapped one of the largest and richest bodies of copper ore ever found in the district. It was struck in a drift on the 700-foot level, and is native copper and decomposed limestone and iron. Several samples brought out ran from 60 to 80 per cent. copper.

THE CITY IN BRIEF.

NEWS AND BUSINESS.

Car Strikes Aged Man.

Louis Pador, 73 years of age, was struck by a street car on Utah and First streets yesterday and seriously hurt.

Off a Wagon.

R. C. Turner, a young teamster, was thrown from a wagon at Temple and Newhall streets yesterday, and one of his legs broken.

Engine On Track.

A locomotive attached to a train of rock cars bound for San Pedro was derailed yesterday morning east of the Archede depot, and traffic delayed for a half an hour.

Chutes Too Garden.

A new tea garden has just been completed at Chutes Park, furnished as it is under the charge of Japanese attendants. A number of unique Japanese works of art are to be found in it.

Alabama Folk Here.

Among yesterday's arrivals at the Van Nuys is a goodly party of Alabama folk, who have been touring the West and who are now on the return trip. The Southerners came here from Salt Lake City, and express themselves as delighted with the happy, sunny climate of Southern California.

Stone's Latest.

A relief portrait of Miss Susan B. Anthony has been completed by Frank S. Stone, the local sculptor, and is on exhibition at his studio, No. 317 North Broadway. The portrait is surrounded with an intricate wreath of roses and leaves, and the picture is a work of art.

Check No Good.

J. L. Harnard, a merchant at No. 113 Commercial street, reported to the detectives that a man calling himself Dr. D. H. Miller, went to his store yesterday and got a quantity of supplies which he said were for the Medical Hospital, paying with a check for \$10, which turned out to be worthless.

Sixth and Burlington.

William M. Humphreys has sold to a local investor eight acres extending north from Sixth street along Burlington avenue, unimproved, for \$45,000. The property lies just below the Cross Hill district and the lots in it will probably be put on the market. Mr. Humphreys still holds as much more acreage immediately adjoining.

The congregation of the United Norwegian Lutheran Church has grown to such proportions that a regular pastor has been installed. He is Rev. S. J. Brevik, late of Minneapolis, Minn. Services will be conducted in the Scandinavian tongue on Sunday forenoon in the hall at the corner of Griffith avenue and East Washington street.

Red-Hot Affinity.

A cosmopolitan mass of humanity hurried itself with its heterogeneous personal effects to the street about 8 o'clock last night, because of the combustible affinity between a red-hot stove and a wooden partition in the cheap lodging-house of Salvador Julian at No. 841 Dale street. The damage to the building, which is the property of L. Flores, amounted to \$150.

For Civic Improvements.

The South Side Improvement Association will hold a meeting on Monday evening at 8 o'clock at No. 338 South Main street. Officers will be elected for the ensuing year, and action will be taken on proposed amendments to the city charter and the establishment of a new ward for that part of the city. The Vernon Improvement Association will meet in conjunction with the South Side Association.

A Pastor's Vocation.

Dr. A. C. Trow, rector of the Church of the Angels, Garvanza, and All Saints Church, Highland Park, has gone to Squirrel Inn, in the San Bernardino Mountains, for a three weeks' vacation. Next Sunday Bishop J. H. Johnson will officiate at the 11 o'clock service at All Saints Church, corner of West Avenue 54 and Ash street, and at 2:30 o'clock at the Church of the Angels, Garvanza.

Al Malakiah Temple.

Al Malakiah Temple, Nobles of the Mystic Shrine, has postponed the ceremonial session planned for this month. The lack of a suitable hall has been a serious drawback. Preparation is being made for a session to be held Saturday, September 22, at the Hotel Potrero, Santa Barbara, where an elaborate banquet will be served. Plans for the Imperial council of the Ancient Arabic Order, Nobles of the Mystic Shrine of North America, to meet in Los Angeles in May, 1935, will be discussed at that session.

Weather Last Month.

The meteorological summary for the Los Angeles Weather Bureau for last month shows the highest temperature to have been the lowest, 74 deg., the greatest daily range 21 deg., and the least daily range 11 deg. The mean temperature for the month was 69 deg. The mean for twenty-eight years for July was 72.5 deg. The prevailing wind for the month was west and the total movement was 3380 miles. The greatest velocity (three minutes) was twenty-one miles. There were ten cloudy and nineteen partly cloudy days.

Not Suing Mother.

Ferdinand Sarnew, whose name originally appeared as a complainant in the contest over the will of his father, August Sarnew, now pending in the Superior Court, has had his name withdrawn as a plaintiff. He appeared as a witness for his mother, the defendant, in the action brought by his brother to show that her father's will was found in a drawer, torn up by his mother, and then placed together. Ferdinand Sarnew says his name was attached by his brother to the complaint without authority.

Barton Bible Meetings.

Benjamin H. Barton, a representative of the Watch Tower Bible and Tract Society will be in Los Angeles on Saturday and Sunday. Mr. Barton is an undenominational speaker and will address meetings at Mammoth Hall, No. 317 South Broadway on Saturday afternoon and evening and on Sunday morning, afternoon, and evening. Mr. Barton has spoken several times in this city and recently conducted a series of meetings in Elmer Hall, which were largely attended. His message is free and no collections are taken. On Sunday evening the topic will be "The Destruction of Death."

The Annual New Birth.

Science teaches that the entire body is built up each year. Perfect health can therefore be ultimately attained by ceasing habits which destroy the vitality of life cells and substituting daily habits which build up and destroy the vitality of life. This is the only way to live. It will make a new man of you. It enables invalids to give well and strong. Office hours, 10 a. m. to 5 p. m. 235 South Grand avenue, Room 235.

SPANISH RECIPES.

Times Cook Book No. 2, New Ready. 3000 copies and other copies, have been printed in book form and are on sale at the Times' Business Office. Price 15 cents. In special cloth cover, 25 cents. By mail 25 cents extra.

BREVITIES.

The managers of The Coronado Mansions, 671 and 673 Coronado street, and the Coronado Mansion Annexes on Rampart street in the beautiful Westlake district, still have fine rooms, en suite or single, for those that want home comforts. Phone Atwood, 7729 Home, or Main 8074.

The Coronado Mansions—dining parlors at 671 and 673 Coronado street, are open for transient or regular boarders. Atwood, manager. Both phones. Good chef and pastry cook; our well-served patrons are our recommendations.

The Coronado Mansions—671 and 673 Coronado street—can accommodate 20 more for rooms and 20 more in their dining parlors, four cozy dining parlors now open.

Your eyes. Consult George A. Picou, D. O., with A. E. Morro, manufacturing optician, No. 243 South Spring. Oculist prescriptions filled.

The most popular place in city, Hotel Rosely, 428 So. Main street, meals \$2, 21 meals \$5.

There are undelivered telegrams at the office of the Western Union Telegraph Company for Mrs. N. H. Smith, Lew A. Watson, W. C. Cooks, Mr. Beckelaw, care of R. G. Walters, E. C. Ryan, Rector Episcopal Church (Hollywood), T. G. Tinsley, Mr. and Mrs. H. Fortner, Mrs. W. C. Reed, Louis Bowles, Geo. M. Luber, Mrs. H. D. Loren, Mrs. Jos. Bowers, Jno. E. Rose, A. Fran, Theo. Felling, Morris Cohn, John Ryan (D. Josephine Wright).

Hops at Kramers close August 26.

Prospective Husband Puts up Bail for Agnes of Many Names, Who Fought Arresting Officers When Accused of Piffing at the House Where She Had Worked.

"To hailing the bride of jail for the wedding—fifty plunks!" will doubtless appear in the nuptial diary of Max Mathewson, the first page of which was opened last night.

The lady in the case was little Agnes of many names, among which are Hammers, Blair and Mathewson, who was arrested yesterday for stealing.

The officers, whom she fought like an outraged tiger cat, did not know at that time that she was a housewife who was stealing for.

The girl was taken in custody yesterday morning by the city detectives. About six weeks ago she went to work for the family of J. H. Revell at No. 151 West Eighteenth street. Small articles of jewelry and even things to eat were missed from the house. A few days ago the girl disappeared. It has since been learned that she gave away many pieces of jewelry to the neighbors.

The complaint against her was sworn to yesterday by a girl named Goldborough, who said that Miss Blair had given her a stick-pin identified as belonging to the Revell family. Miss Goldborough claimed, however, that the girl stole a \$12 bracelet from her.

Agnes was found at a lodging-house at Main and Fifteenth streets living. It is claimed, with Mathewson, who is a hostler at a livery stable. They were preparing for their wedding under these unceremonious circumstances, and the girl was providing her trousseau. The very day of the arrest they had procured the license. So no wonder the girl fought when they tried to arrest her.

Last night, Mathewson went to the Police Station with a great degree of agitation and \$50 which he placed with the clerk. The girl was then let out of jail, and together they left, their purpose being to marry without delay.

PERSONAL.

Harry Alexander, San Francisco manufacturer, is at the Nadeau.

J. E. Kelley, a business man of Detroit, is staying at the Lankers.

William Curlett, San Francisco architect, is among the arrivals at the Van Nuys.

David Evans, capitalist of Salt Lake, and butler of the Hotel Venice, is a guest at the Angelus.

W. Baur, Oxnard sugar expert, now of New York, is at the Van Nuys for a few days on his business.

An Angelus guest who will remain some weeks in Southern California is George W. Woodruff, of the United States Department of Agriculture.

Two Illinois grain merchants are at the Westminster, looking over Southern California prospects. They are John A. Youst of Chicago, and Fred J. Cerk of Peoria.

VITAL RECORD: BIRTHS, DEATHS, MARRIAGES.

BIRTHS.

BIXBY, August 2, to the wife of Cleopatra Bixby, a daughter at the California Hospital.

MARTIN, At No. 621 Polard avenue, Los Angeles, August 2, 1934, Morton Martin, aged 2 years, son of W. A. Stewart, No. 2322 Highland Place, Friday at 1 p. m. Friends invited.

LYRAHIT, At No. 1214 North Main street, August 2, John Lyrahit, aged 4 years, son of the late J. H. Lyrahit, and his wife, Mrs. Lyrahit, both deceased. Burial at the cemetery of the Lady of the Angels (Paseo) today at 1 o'clock p. m. Interment, New Calvary.

COURTNEY, August 1, Mrs. Cecilia Courtney, wife of the late Courtney, and mother of G. H. Courtney, aged 61 years, died at 10 a. m. at the home of G. H. Courtney, 1014 North Main street, Friday at 1 p. m. Interment, Rosewood Cemetery.

MARRIAGES.

ROHRER-KENY, Dorothea Rohrer, aged 31, a native of Germany, and Louis M. Keny, aged 31, a native of Hungary, both residents of Los Angeles.

October First the Final Date—Men's Clothing Must Go. ENTIRE DEPARTMENT TO BE SOLD OUT

We have fixed October 1st as the final date on which the floor space now occupied by men's clothing must be turned over to workmen and prepared for other departments.

If we can accomplish our purpose before that time we shall be still more pleased, for many branches of our business are badly in need of additional space.

Our entire stock of men's clothing will be turned into cash. Much of it will be sacrificed for far less than cost price. Without question, it is the most remarkable clothing opportunity that has ever occurred in the city.

\$10.00, \$12.50, \$15.00, \$17.50 and \$20.00 MEN'S SUITS \$5.95

This assortment comprises odd suits gathered from our regular lines that have been selling from \$10.00 as high as \$20.00. There are sizes to fit every man, but not all sizes in each style. The suits are made of good quality of woollens, carefully tailored, and first class in all particulars. Some men will think these suits must be undesirable on account of the low price, but we give our assurance that they are attractive, well-made suits that any man could wear.

\$25.00 business suits, \$15.95. \$30.00 business suits, \$14.45. \$17.00 business suits, \$11.95. \$10.00 business suits, \$7.45. \$12.50 business suits, \$8.88. \$15.00 business suits, \$9.95.

Note These Sacrifice Prices: \$8.00 youths' suits, \$3.50. \$10.00 men's bicycle suits, \$3.50. \$35.00 full dress suits, \$12.50. \$3.00 and \$4.00 corduroy pants, \$2.60. Separate trousers, one-third off. Linen dusters, one-half off. Barber and bar coats, one-half off. \$15.00 coats and vests, \$2.50.

Something Doing in Men's Furnishings. Four Remarkable Values From This Big Department.

50c and 65c Underwear 43c Fancy imported balbrigan, in every known weave and shade. 50c and 65c values at 43c.

75c and \$1.00 Madras Shirts 63c Fancy madras shirts, in fast colors. Cuffs attached or detached. Come in fancy patterns and plain white. 75c and \$1.00 shirts at 63c.

\$1.00 and \$1.25 Shirts 89c Scotch and English madras shirts, nothing better made; fit guaranteed. Come with plain or pleated bosoms. Plain white or fancy patterns.

BOYS' WASH SUITS AT HALF PRICE This includes our entire stock—no reservations. Here's an opportunity to provide the boy with a new wash suit at half what you would ordinarily pay. In other words, for 50c you can get a suit worth \$1.00, or \$1.50 will purchase a fine \$3.00 suit. These suits come in the celebrated Regatta and Wash Tub makes, in all the leading styles and materials. Our former low price range from \$1.00 up to \$3.50. Your pick today and tomorrow at half price.

Hair Goods You are certain to be much disappointed if you allow a cheap price to persuade you into buying inferior hair goods such as are sold in department stores. You will be safe at the

NATIONAL BANKS
PLAN BIG MERGER.

Directors of Los Angeles, Southwestern and First Arrange for Amalgamation Under Name of Latter, With Immense Capitalization.

A financial transaction of huge proportions, involving the transfer of about \$18,000,000, plans were perfected yesterday for the amalgamation of the First National Bank, the Los Angeles National Bank and the Southwestern National Bank. Should the stockholders of these institutions ratify the action of the directors, their decision will consummate the biggest business deal in the history of Los Angeles. The opinion was general among the directors that the consolidation would become a finality.

In addition to the proposed consoli-

W. C. Patterson, G. E. Bittinger, Dan Murphy and Frank P. Flint; Southwestern National—John S. Cravens, John R. Miller and E. T. Marshall. Of these, Mr. Drake also is president of the Los Angeles Trust Company, and Senator Flint president of the Metropolitan Bank and Trust Company.

To Senator Flint is given much of the credit for arranging the details that finally resulted in the outlined amalgamation.

TERMS OF AGREEMENT.

The arrangements, which were not

BISHOP FRANCIS MORA.

BISHOP MORA DEAD:
HE BUILT HERE.

BISHOP FRANCIS MORA is dead. This is the sad message which came by cable to Bishop Conaty, last night from Barcelona, Spain. Bishop Mora died yesterday. He had been in very feeble health for a long period; but only the day before, Bishop Conaty had received a letter from him; and it had been the bishop's plan to visit Bishop Mora on his ad limina visit to Rome this month.

Bishop Mora was the fourth bishop of this diocese, and was beloved as one of the fathers of the diocese. It was during his régime that this diocese emerged from the old Spanish days to those of present American activity; and it was he who laid the foundations on which today are built the prosperity of the diocese. Bishop Mora was born in Vich, Barcelona, Spain, in 1837. He received his early education in that country, and in 1854 was brought to America by Bishop Amat, and entered St. Mary's Seminary of the Vincentians at Ferrisville, Mo. It was his intention to become a member of that order; but his plans were changed, and in 1854 he received minor orders in the old Pima Church in this city, which was then the pre-cathedral. Later he was ordained to the priesthood in this same church, and was appointed rector of Monterey on March 24 of that year.

He was sent to the Church of San Juan Bautista on June 28, 1854, and served there until 1857. His next work was at Pajaro, where he was appointed in 1861, and he then went to the Church of San Juan Bautista in 1863, and in 1866 was vicar-general, and was sent to Rome on the ad limina visit for Bishop Amat.

On May 20, 1872, he was appointed coadjutor bishop to Bishop Amat, with the right of succession, and was consecrated in the old Pima Church on August 5, 1872. He succeeded to the bishopric on the death of Bishop Amat, May 12, 1873.

During his work in the northern part of the diocese he suffered a severe accident in a runaway, whereby he was thrown out of his vehicle, and struck his head upon the wheel. This caused his health to decline, and on account of his increasing feebleness he sought a coadjutor. The present Arch-

bishop George Montgomery was appointed his coadjutor, with right of succession, April 2, 1884, and in May, 1886, Bishop Mora's resignation as bishop of the diocese was accepted at Rome, and he returned to his native land.

Since that time he had lived in Barcelona; but despite his infirm condition he always maintained an active interest in the diocese where he spent so many arduous years of labor. He was the first resident bishop at the Cathedral of St. Vibiana, and celebrated the first mass in that edifice, as well as officiating at its dedication. At that period there were but two Roman Catholic parishes in Los Angeles—the old Pima parish, and the Cathedral parish. The great influx of Americans caused him to organize many new parishes, and to plan church development in all parts of the diocese.

For several years Father Adam, former rector at the Cathedral, has also been a resident of Barcelona, and he has spent much time with Bishop Mora. Each year the bishop had received visits from numerous Angelenos, as well as European visitors, and he was not unexpected, owing to his age and generally broken health.

VANDALS' HAND
TO BE STAYED.PURISIMA MISSION COMES TO
LANDMARKS CLUB.

Beautiful and Picturesque Old Pile, Now Almost Ruined, Will Be Restored and Preserved, as Result of Deed of Gift from the Union Oil Company.

Another step of importance has been taken in the preservation of the old missions of California. The Landmarks Club, is to come into possession, by deed of gift, of the picturesque Purisima Mission in Santa Barbara county, and will restore it to its former state, despite the sad work accomplished by vandals for its ruin.

The gift is made by the Union Oil Company of California, of which Lyman Stewart of this city is the president, and the deed will be placed on record as soon as the Supervising Committee of the Landmarks Club can make a visit of inspection to the mission, and decide just what portion of ground they desire included in the deed.

This committee is composed of Sumner F. Hunt, Arthur B. Benton and Charles P. Lummus, and upon them will devolve the restoration of the now dilapidated mission buildings.

This is the first mission property to be actually acquired by the Landmarks Club, by deed; although it has several under its supervision through long lease holdings. The club holds long-term leases on San Fernando Mission, San Juan Capistrano and Pala, with clauses in these instruments which provide for a continuance of the arrangement at the expiration of the ten-year periods. The club is also assisting in the work of restoration at San Luis Rey and San Diego.

But the Purisima Mission has been at the mercy of vandals and in the past ten years it has suffered terrible inroads. A decade ago it retained much of its original architectural beauty and was fairly well preserved. Since that

BISHOP FRANCIS MORA.
Who died yesterday in Barcelona, Spain.

bishop George Montgomery was appointed his coadjutor, with right of succession, April 2, 1884, and in May, 1886, Bishop Mora's resignation as bishop of the diocese was accepted at Rome, and he returned to his native land.

Since that time he had lived in Barcelona; but despite his infirm condition he always maintained an active interest in the diocese where he spent so many arduous years of labor. He was the first resident bishop at the Cathedral of St. Vibiana, and celebrated the first mass in that edifice, as well as officiating at its dedication. At that period there were but two Roman Catholic parishes in Los Angeles—the old Pima parish, and the Cathedral parish. The great influx of Americans caused him to organize many new parishes, and to plan church development in all parts of the diocese.

For several years Father Adam, former rector at the Cathedral, has also been a resident of Barcelona, and he has spent much time with Bishop Mora. Each year the bishop had received visits from numerous Angelenos, as well as European visitors, and he was not unexpected, owing to his age and generally broken health.

time it has very rapidly deteriorated, and the movement of the Union Oil Company is taken hardly in time to save the historical structure from complete ruin.

"La Purisima Concepcion Mission," was the third of the channel missions. It was established December 2, 1781, on the site of the first of the immaculate Conception. The buildings were begun in the following March.

The mission was first in charge of Father President Lausen and Father Vincete Fuster, and a layman, José Arrolto. Later the work was carried on by Father Cristobal Orman.

La Purisima Concepcion lies off the beaten track of travel, and is little known to the hurried traveler or tourist. It, however, has a charm of its own, and many historical associations.

It is eighteen miles north of Santa Ynez and twelve miles from the ocean. The mission was founded in 1844, and several years ago it passed into the hands of the Union Oil Company. There has been little opportunity to protect it, and its present state shows that many persons have taken a mean advantage of this fact. Finally, through the efforts of Lyman Stewart, the plan to present it to the Landmarks Club was carried through.

In 1812, known among the Spanish people and the Indians in California as el año de los temblores, because of the fact that during the entire year, from time to time, earthquakes were felt, the Mission Purisima was badly damaged, and it was then moved by the padre about five miles from the original site. The shock which caused the great damage took place on a Sunday, December 4, 1812.

The great Indian revolt of 1813, the object of which was to kill off the "gente de razon"—people of intelligence—and free themselves forever from their rule, started at the Purisima Mission, and then spread to the mission Santa Inez, San Luis Obispo, Santa Barbara, San Buena Ventura and San Fernando. At that time the Indians fired the Mission Purisima, and it was saved.

It is expected that a tract of about three acres surrounding the mission, will be deeded to the Landmarks Club, so that a park may be maintained, and to prevent the encroachment of unsuitable buildings in the vicinity. It is the aim of the club to restore the mission on exactly the same architectural lines as those of the original building.

Vandal-ruined Mission La Purisima Concepcion now and ten years ago. Restoration will be as the lower picture shows it.

ORGANS

We have recently received from Los Angeles churches orders for two fine Estey Pipe Organs. One of these arrived from the factory a short time ago, and is now on exhibition in our show rooms. Church committees and others interested are earnestly invited to inspect the instrument. Organists are especially invited to give it a practical test.

On account of new methods of construction a \$2500 Estey Pipe Organ gives more volume and variety of tone than other makes costing from \$500 to \$1000 more.

THE PUBLIC SERVICE.

SUMMARY OF THE DAY.

Supt. Mulholland yesterday afternoon exhibited reports of chemical tests of the water of the Owens River; these tests show that it is much freer from liquid solids than our present domestic product.

Chemists yesterday held up to ridicule the statement made by the Examiner that the water of the Owens River is infected with typhoid fever germs.

The Friday Morning Club yesterday filed with the City Clerk a resolution asking the Council to approve Mayor's dismissal of Library Directors Dockweiler, Marshuta, Trueworthy and Wright.

A sad story was told by Mary Sentner in Judge Traak's court while trying to obtain a divorce. It illustrated the white slavery of the large eastern cities in a manner seldom exploited in the courts.

L. F. Durand, who fell into a trap set by peace officers after his wife had complained of his threats to kill her, was examined before Justice Pierce yesterday and placed under heavy bonds to keep the peace for six months.

AT THE CITY HALL.

ALL PRAISE THE WATER BOARD.

CONGRATULATORY TELEGRAMS FROM NEIGHBORING CITIES.

Dashing Enterprise of Local Chemists Blazes Trail—Chemists Ridicule Knockers' Attempt to Raise Doubt as to Purity of Owens River Water—Reports Highly Favorable.

Growing in volume hourly, like the forests that plunge down the slopes of Mount Whitney, as the melting August sun penetrates the canyons of eternal winter, is the enthusiasm that greets the magnificent enterprise by which a river is to be brought to the gates of the city.

Most heartily the people of the southland demonstrate that they consider the settlement of the vexed water problem the most important event in the city's history.

Score of citizens called yesterday at President Ray's office in the water department building to congratulate the board on the successful termination of the negotiations for securing the Owens River property.

For the announcement of the dashing enterprise which Los Angeles has displayed in securing a water project has spread to the four corners of the earth.

From San Francisco came congratulatory resolutions passed by the Board of Supervisors of the northern city. For several years San Francisco has been endeavoring to finance a project to secure a water supply from Tuolumne County, 150 miles away.

San Jose has evinced the hardihood to go 100 miles beyond its boundaries to get water the 150-mile project contemplated by San Francisco does not appear nearly so formidable.

There is something romantic about going further for water than any other city in the world has yet gone, and impending the welfare of many of the highest mountain in the United States, that seems entirely in keeping with the gaunt history of Southern California.

That the electors of Los Angeles will give their endorsement to the proposed issue of \$1,000,000 bonds for obtaining a permanent title to the land and water in the Owens Valley, and for completing surveys and installing power plants, is not doubted by those who have the future welfare of the city at heart.

The bond election will probably be held about August 25. A few persons financially interested in petty schemes for securing water rights in streams that have been pronounced inadequate by the government engineers, are now; a few persons, disappointed because they are not permitted to make a few thousand dollars in options, at an expense of \$1,000,000 to the city, are trying to belittle the magnitude of the project.

And of course there is the yellow Examiner, which developed a serious attack of jaundice at the prospect of the completion of the successful negotiations for the project.

First the Examiner pleaded with its alleged subscribers to vote against the bonds because the city could do better to take the water of the Owens River, next of the San Bernardino Mountains. Government and municipal engineers held this project up to such ridicule that it was almost a project, vanished for a moment, to substitute Pure Creek for Owens River.

The Examiner's latest effort is to say that the water of the Owens River is infected with typhoid fever germs; that it would bring an epidemic to Los Angeles.

This sad story is based on an alleged interview with a Pasadena physician who is quoted as saying that typhoid fever is endemic at Bishop, in the northern end of the Owens Valley.

Most ridiculous of all, say chemists and bacteriologists, is this assertion that the water of the Owens River is infected with germs of typhoid fever. It would be just as impossible for typhoid germs to propagate on those mountain sides as it would be for flies to thrive in the pipes of our domestic water supply.

There has been typhoid fever in Bishop during the last year, yesterday said Superintendent Mulholland, "it was occasioned by filthy cesspools. Bishop is now building its first sewer to get rid of the typhoid fever."

The report that streams of Owens Valley carry germs of typhoid fever is absurd on the face of it, yesterday said Dr. R. V. Day, former city chemist. "Typhoid germs do not exist in mountainous country, except as they are carried there by some typhoid patient. One of the streams might become infected by those germs if some person suffering from the disease camped on its banks and the excrement were thrown on the snow. That might infect the water for a short period. But the danger of infecting the banks of streams are 100 times as great in the Sierra Nevada Valley as in the Sierra Nevada Valley."

It is as reasonable to say that the waters were infected with live monkeys. Monkeys are not natives of that territory; no more are typhoid fever germs.

"If the water is brought here in a closed conduit it will probably be as fine drinking water as that supplied to any city in the country."

From the records of the department President Mulholland yesterday afternoon took the following reports of tests for liquid solids in a gallon of Los Angeles River water and in a like amount of Owens River water.

SWEET MARIE
"GETSEVEN."

In Tiverton and Wins Five
Thousand Dollars.

When Thought That the
Chances Were Even.

How Lost to Seattle—In
International Yachting.

WIRE TO THE TIMES

SEATTLE, Aug. 3.—(Exclusive) Before a crowd of several thousand persons assembled at the waterfront this afternoon, Sweet Marie won the first prize of \$5,000 in the international yachting contest. The time by quarters was 22, 23, 24, 25.

Sweet Marie won the second heat by 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25.

Assembly of boat-selling, the general opinion was that Sweet Marie was the best.

ANOTHER ACCOUNT.

SEATTLE, Aug. 3.—(Exclusive) Sweet Marie today at Seattle won the first prize of \$5,000 in the international yachting contest. The time by quarters was 22, 23, 24, 25.

Seattle, Aug. 3.—(Exclusive) Sweet Marie today at Seattle won the first prize of \$5,000 in the international yachting contest. The time by quarters was 22, 23, 24, 25.

Seattle, Aug. 3.—(Exclusive) Sweet Marie today at Seattle won the first prize of \$5,000 in the international yachting contest. The time by quarters was 22, 23, 24, 25.

Delightful Weather Featured the

Regatta—Style of the Oarsmen of

Various Countries Compared by

English Expert Who Saw the Con-

testing.

The Henley regatta of 1905 was no-

ticed by the large number

of the competitors who entered for

the races and for the delightful weather

which was graciously accorded to them

by the powers that preside over these

matters, says the London Post. The

last two days were such as the days of

an English summer should always be

and rarely are. The rowing record of

the year is not in any respect unusual.

The Leader club eight again won the

Grand Challenge Cup, beating both the

American crew from Philadelphia and

the Club Nautique de Gand, who sent

a very fine eight from Belgium.

The Belgians and Americans both

showed a very fine style of rowing.

The English crew was the best of the

lot, and indeed proved to be

superior to the best English method.

Both crews had very little swing and

made very little use of their weight.

The greatest of all agencies for pro-

moting the regatta was the

American and Belgian oarsmen.

The American crew was the best of the

lot, and indeed proved to be

superior to the best English method.

Both crews had very little swing and

made very little use of their weight.

The time limit of ten days after the

publication of the new blacklisting

rule is allowed players to get back into

harness, and it is expected that many

contract jumpers will take advantage

of the opportunity to get "out of the

wet" before it is too late.

Yesterday afternoon, having defeated

his doubles partner H. Rising in a bril-

liant match, Bundy hooked up with

Variel, a lad who on his day will give

the best of them his troubles, but at

the moment he was not playing ball

through the back fence without any

real provocation.

The pair came on about mid-after-

noon, and Bundy started as if it were

all over but the shouting, running

Bundy to three love as is usually the

case before the Santa Monica starts

a real game. Bundy made a mistake

Variel's swift service, there was nothing

to the match but "Uphill Tommy."

Using his head in every stroke, he

Redmond, who is the best of them

would chase him to the back lines by

lobbing just over Bundy's head. Placing

the ball cleverly just out of Variel's

reach was a great point gained for

Bundy, and he demonstrated superior-

ity at every branch of cool, calculat-

ing tennis, losing out in an occasional

rally by the other's grand stand strikes.

PART II: EDITORIAL, LOCAL AND BUSINESS SECTION

Denial

The bigger a thing is the better Los Angeles likes to tackle it.

The Jews have at last found one foe they fear—Yellow Jack, the scourge of Panama.

The Kaiser says he prefers a monarchy to a republic. That's very strange, isn't it?

A nation, any more than an individual, cannot expect to feel right unless it has a good constitution.

The summer girl should bear in mind the fact that it is to be a knot.

The Grand Duke held a council in St. Petersburg during the week. As far as we can learn they were all sober.

Count Tolstoi speaks of a condition which he calls "Christian anarchy." It must be much the same thing as a white blackbird.

Let the summer girl enjoy herself while she may. Youth will pass, at last, and then she'll have to join a club and run the town.

The man who asks the Northern Pacific Railroad Company for tick days will be disappointed. The telegraphers are on strike.

The Chinese are waking up to the fact that although they invented gunpowder, they haven't made quite the use of it that they might have done.

The new Swedish Cabinet won't last long. There's only one man by the name of Petersen in it; no Olofson had no Jansson. It therefore doesn't represent the country.

Norway has been getting along very nicely for several weeks past, and the fact that it has no king is a good sign. Which shows that all a king is good for is to cut up the people's good money.

The local real estate boomers having worked out Redondo and the other places, they are now considering the advisability of creating a stampede for leech property on the shores of Salton Sea.

The Kaiser has become England's best man. After awhile they will use him to scare the children, like they did with Paul Jones when he was shooting up the white cliffs and the headlands, over there.

It is strange how many young men there are who refuse to become rich by marrying heiresses, and afterward kill themselves in a fruitless effort to dig a fortune out of the adamant heart of a cold world.

A rich woman who remains a widow after her husband dies does more to convince us that the female sex may be safely entrusted with the right of suffrage than a thousand books on the subject, or the same number of Anna Shaw's lectures.

The health in Asia evidently has no intention whatever of deserting his gods, but he has also come to the conclusion that a full equipment of Krupp guns and modern rifles would assist the efficacy of burning punk sticks to a considerable extent.

Singlehanded and alone, Yellow Jack stands guard on the isthmus of Panama, hurling defiance at steam ships, yachts, derbies, and the craft of commerce. No more desperate foe have stood between the two seas, and we have the fight of our lives on our hands to overthrow him.

Although when the announcement was first made, we were really flattered to learn that the peace envoys would conduct the negotiations at Portsmouth in English, we fear now that they would make a grave mistake in doing so. Those Down East Yankees couldn't resist the temptation to listen at the keyhole, and, moreover, to find fault with the accent used on both sides.

It is beginning to be feared that William Travers Jerome, New York's District Attorney, is a reformer on paper. He has been howling against Tammany all the years he has been in office, but he hasn't done anything so far as anybody can notice. Contrast Mr. Jerome with Joe Fols, and the result is painful. Fols hung the hides of the grafters on the barn door. But they still hold their skins in New York. And they're making snouts at Jerome.

According to the local Hearst paper the Gulf of California has broken into the Salton Sea, by means of a mysterious, newly-found fissure in the earth. Also the climate of Southern California is to be changed thereby. Also again and in addition thereto, deep-sea fish are now being found in Salton Sink. It is difficult to tell which of these statements is the most ridiculous, but the fish story may be said to take first rank. A fish could no more live in that mess of brine than on dry land. Thus the lemon-hued thing continues to print everything but news and the truth.

THE TIMES DELIVERED AT THE RESORTS.

Patrons of The Times visiting beach resorts during the coming season may have order for their paper with any of the agents on below, or at The Times Business Office, Los Angeles.

A regular carrier service is maintained at the following points:

Catalina—Catalina Novity Co., opposite wharf.

Redondo—W. J. Haas, White Front, Santa Monica, Arthur S. Jackson, 229 S. Street, Sunset Phone 55.

Hermosa—D. A. Morse, storekeeper, Huntington—Edward Royce, 103 Main Street.

Long Beach—L. A. Schinnerer, 9 Pine Avenue, Telephone 101. Widespread, bathhouse and stand on pier.

Ocean Park—J. W. Woodward, 184 Pier Avenue, Enos News Stand.

Terminal Island—Meritt & Real, grocery store.

BUSINESS.

The return of J. P. Morgan to the financial district in New York aroused some interest on 'change, and firmness in steel was ascribed thereto in part.

Professional operators had the market largely to themselves. The close was strong and at the highest. The Chicago wheat market closed steadily with September at 84½¢.

THIS IS FOR PROGRESS.

One bank where there are three now. That is what is proposed here in Los Angeles. This is a movement in the right direction. It is progress.

That may seem to some paradoxical. It is financial wisdom. There are too many banks in this city. There have been too many ever since 1885, or thereabouts.

Why so? Because the consolidated banks, all acting in one, will be stronger than the three were acting separately. The point is not that the expenses of one bank will be less than those of three. That is a very small matter, and the saving will affect none excepting the stockholders. It is the public interest that is in view in what is said here.

If all the deposits held by the three banks are transferred to the surviving one, it will have about \$13,000,000 in deposits, and some \$16,000,000 in assets. There will be no more money in the new arrangement than in the old. Neither is there any more help in a ship's cable than there is in the separate strands out of which it is twisted, but it will hold a greater strain.

Strength is the quality desired in the cable, so it is in a bank. The combined assets will all be under the same management, and all their energy can be better directed towards any desired end. The prosperity of the community—that is, the success of each and all its enterprises—depends largely on the way in which the money of the community, the deposits in the banks, is used by those who control that money.

The same skill in banking may have the handling of these funds in one case as in the other, but the fact that it is all together makes it possible to handle it with greater effectiveness.

Besides the three banks going together, they propose to gain control of two trust companies, thus making the consolidation still more effective. The resulting financial energy will be very great. The consolidated institution will have greater strength than any other in the whole State of California, with very few exceptions.

It may seem a thing for which there is no necessity thus to strengthen a situation already strong, as is comfessedly the case with the financial institutions of Los Angeles. There is not a cloud above the business horizon. How is it below the horizon?

The mariner does not have to take in sail in good weather. That is true, but it is a good thing to know that the stress of weather arises the ship's track is all strong and easy to work. That is all this combination of three great banks means; and, whether intended or not, it really seems to be a move for the public good.

FIGHTING YELLOW FEVER.

The outbreak of yellow fever at New Orleans and at one or two other points in the South, while it was unexpected, is not so serious as the present writing as to cause very much alarm. It was unexpected, because the experience which American sanitary officers gained in Cuba, and the lessons learned while subduing the pest there, were supposed to have taught the people of the United States lessons which they would turn to their own advantage in preventing a recurrence of the disease in this country.

Havana, before the American occupation, was one of the pest-holes of the world. American sanitary science

transformed it into one of the most healthful of cities, if not into a veritable sanatorium. The important discovery was made (and it cost several heroic men their lives to establish the fact) that yellow fever is transmitted solely by a certain kind of mosquito.

After this fact had been fully established, at Havana, the stamping out of the disease was comparatively easy. All the breeding places of the mosquito were invaded with petroleum, and gradually the disease-spreading pests were exterminated. With their extermination yellow fever disappeared from Havana.

Mosquito-killing became quite popular in the United States, after the remarkable results achieved at Havana. But eternal vigilance is the price of exemption from the mosquito pest. It is not improbable that the health authorities in New Orleans have relaxed their vigilance somewhat, allowing the death-dealing mosquitoes to increase in numbers. But there is little doubt that the disease will speedily be conquered; for the heroes of science who willingly gave up their lives at Havana made the way clear.

The thoroughness with which the Americans did their work at Havana is demonstrated by the fact that there has been practically no recurrence of the disease in that city since its disappearance under the American regime. It is possible that the New Orleans contagion came from Panama, although there have been but few cases of the disease on the isthmus, and little fear is entertained of an epidemic there. Col. Gorgas, who was chief sanitary officer at Havana and supervised the extermination of the epidemic there, is in charge of sanitary affairs on the isthmus. This fact, in itself, is almost as good as a guarantee that there will be no serious epidemic of yellow fever in Panama.

Col. Gorgas understands his business, and he is sure death to "sketchers."

ONE COSTLY LESSON.

The deplorable catastrophe in San Diego harbor, by which nearly seventy of the brave sailormen of the U. S. S. Bennington lost their lives, while many others were injured, has taught one lesson, which must be heeded for all time. As shown in an exclusive dispatch to The Times, the boiler explosion was due to crystallization of the heavy steel bolts which the crown sheet was riveted to the boiler shell. These bolts were found to have been snapped off squarely, as steel breaks under strain when hardened, or crystallized.

The breaking of these steel rivets or bolts caused the disaster, and they broke because they had become brittle after long use. The boilers, it is stated, had been in commission continuously since 1888.

The lesson of this terrible disaster is clear. There must be more regular, systematic and thorough examination and testing of boilers and other machinery on our warships. These examinations and tests must not be merely perfunctory. They must go to the bottom of things, and the search should be more thorough, if possible, as the age of the boilers increases.

The supposition should be that after a boiler has been in use continuously for a period of ten or more years, it is in need of thorough overhauling and probable repair.

There is no certainty that other vessels of our navy have not defective boilers, like that which wrought such havoc on the Bennington. This disaster has shocked the American people into the knowledge that the system of inspection, which they had supposed to be all that it ought to be, is seriously defective in some respects. No doubt the report of the Court of Inquiry will throw additional light on the disaster, but it will not change the essential fact that one of the boilers of the Bennington was defective, nor the fact that the defect might have been discovered and remedied if proper hydraulic tests had been applied.

It is, of course, absolutely essential to the efficiency of the navy that each and every one of its units shall be kept, so far as possible, in first class order and ready for instant action. And furthermore, there can be no excuse for subjecting the fighting men of the navy to dangers from defects that can be remedied by proper vigilance and care. There are dangers and discomforts enough in the lives of naval men at the best, without adding to them unnecessarily.

THE IRRIGATION CONGRESS.

One of the most potent organizations for good in the West is the great Irrigation Congress, which meets yearly in some western city. It has been a western institution for the West directly, and for the whole country and all its business interests by building up the West and making new markets for the East. It has been an influence for great good, and, in spite of sinister efforts on the part of corrupt and selfish politicians to twist its energies into channels where the public interests would not have been subserved, the congress has always been controlled by clean men whose impulses were patriotic.

The call is out for the thirteenth session of this body, which is to meet at Portland, Or., August 21 and 24, both dates inclusive. There will be a great many persons from all parts of the United States representing all interests of all sections gathered at Portland, because of the Lewis and Clark Exposition in that city. The opportunity will be great to reach the leading minds of the country.

Southern California is entitled to about fifty delegates, and Southern California has vast interests at stake in the work of this congress. Good citizens may serve their country well by going as delegates on this occasion. There may not be great glory in the

service, but there will be substantial public benefit in it. This portion of the State should send a delegation second to none. There are persons here of high intelligence who have the means and time to honor their city by serving in this capacity. Fifty thoroughly representative men from the various municipal and civic bodies in this portion of California would make a most favorable impression on the minds of visitors from all the States who may be at the exposition.

DEATH OF BISHOP MORA.

The people of Los Angeles and all Southern California will learn this morning of the loss of an old and well-beloved friend. The Rt. Rev. Francis Mora, fourth Roman Catholic Bishop of the diocese of Monterey and Los Angeles, is dead. Far away, in his native land of Spain, he lies today at peace from pain, and done forever with the things of this world. He was a good and a holy man, and the reward of a clean and useful life is now his in the Great Beyond.

Bishop Mora spent forty years of his life in Los Angeles. He was here from 1856 to 1896, and witnessed the growth of the ancient pueblo into a great, strong, magnificent city. In that growth he was a factor, for Bishop Mora was an enterprising citizen and broad-brained business man, as well as an earnest minister.

His sacred robes of office became him not more than his every day garb as a man of affairs. He was long a familiar and a highly respected figure among us, and did his part bravely and well to speed our city forward on its path of progress.

Peace to the good man gone. God rest him, away off yonder in his quiet grave among the olive groves of Spain.

NIGHT SONG OF THE WAVES.

On! On! we sped with a wild unrest. With the dreaming night to our bosom prest:

On! On! to the verge where the light is red! To the hills of dawn, to the hills of dawn!

Beyond! Beyond! on our surging cry. When the desolate wind goes by, seas spread.

On! On! we sped with our dark wings spread. Beyond! Beyond! where the dawn is red!

The blind ships plunge in the furrows deep. As the thunders wake from their cradled sleep.

While we in the wiles of our trackless flight. By the danger-shoals, where the squall-clouds fight.

Reel over the leagues of contending tide. As the surging cry as it wanders wide.

On! On! still on! by the vastness led. Beyond! Beyond! where the dawn is red!

The rain-dribs follow; but lose the trail Where our voices die, and the north- wind never go back, we never go back.

Though wreck o'er the waste send its sweet, low cry. As we on the echo, we fly, we fly.

On! On! we sped with our dark wings spread. Beyond! Beyond! where the dawn is red!

We cross in the wake of the heli-buoys' call. But tarrying not at its rise and fall.

On! On! we sped in our yearning quest. Wit, the dreaming night to our bosom prest.

And never we stop in our mad delight. But ever and ever our flight, our flight, is on! still on! by the vastness led. Beyond! Beyond! where the dawn is red!

—Herbert Randall, in Boston Transcript.

What They Talked About.

Dearly doth the Kaiser love the lime-light. It was a splendidly chosen spot. "Come, alone, all, all alone, alone on the stage, alone on the stage, alone on the stage."

There was nothing to obstruct the view of a rubbering board; there was everything to obstruct the view of a rubbering board; there was everything to obstruct the view of a rubbering board.

What did these two relics of feudalism, almost the last ones in Europe, talk about with the winds of the thirteenth century? They talked about the scheme, let us say, for restoring the liberty to the betrayed and outraged Finns. Both these monarchs are fond of liberty, when it is properly limited.

They love it so well that no one would be surprised to learn that they were planning to free the Poles, or that Nicholas had some project in mind for stopping the slaughter of his Jewish subjects and desired his brother William's cooperation and counsel. Whatever they talked about, it was something peaceful, kindly and benevolent. So much is certain.—(Portland Oregonian.)

Sad Outlook for the Cow.

Amos, Embury, Dr. Sage of Coon Rock, at the head of the bay, is now trying to put Luther Burbank in the shade in the work of new creations. He is trying to cross milk with strawberries, and produce strawberries and cream on the same plant. He is using the evergreen strawberry so that he can produce the strawberries any season of the year, and by careful cultivation and selection of the milk used he is confident that he can produce a plant which, unlike a cow, won't go dry.—(South Bend Or.) Journal.

An Anxious Nurse.

A medical journal has a story to the effect that a woman who was severely ill awoke one night, and found the nurse sitting at the foot of her bed, smoking a cigarette and reading a novel. Greatly startled, the patient called out: "What are you doing, nurse?" To which the nurse, dropping cigarette and novel in amazement, replied: "Good gracious! I thought you were dead!"—(Liverpool Post.)

An Able Lot of Boomers.

Los Angeles has an able lot of boomers in her buyers of furniture. Writers for the trade and newspapers have been hypnotized during their stay in Grand Rapids, and the City of the Angels has gained a great deal of prominence in the business world without the expenditure of a dollar. The city could well afford to pension the Messrs. Barker, Voligt, Mackie, Linholm, Grether, Bannister and other boomers for life.—(Grand Rapids Artisan-Record.)

PROMINENT PERSONS.

Postmaster Wilcox of New York is in Berlin studying the postal system of that city.

The ornaments and precious stones of the Shah of Persia are valued at more than \$3,000,000.

Congressman E. W. Martin of Deadwood, S. D., has announced his candidacy for the position of United States Senator of South Dakota.

Frederick Fanning Gray of New York has been named as the next governor of Lowell, Mass., has given \$50,000 to the Lowell General Hospital. This brings his gifts to that institution up to \$200,000.

E. H. R. Green, a son of Mrs. Betty Green, enjoys a reputation of horticulturalist in Texas. The flower enterprise will be chartered with a capital stock of \$200,000, practically all to be paid in cash.

Dr. Joseph Spencer Kennard is to have the distinction of being knighted by the King of Italy, at the January 1st. Dr. Kennard recently removed from Philadelphia to Tarrytown, N. Y., and his novels in the Italian tongue have received large royalties than any other American novelist.

Dr. D. S. Lamb, connected with the Army Medical Museum, Washington, D. C., has been given the honor of being the most experienced and expert post-mortem authority in the country. The doctor is a collector of brains, and has purchased for \$20,000 through an agent from the museum of the University of Cornell, who he says has the finest collection in the world.

King Oscar of Sweden was recently on a tour of the coast of Norway, and he was met and stopped at a small station by a crowd of people. He was met by a crowd of people, and he was met by a crowd of people.

Dr. Arisagawa, of Japan was an adopted son of the late Emperor Meiji. He was a great magnate but actual heir to the Japanese throne (the present Crown Prince was born).

Prince Henry of Prussia has just purchased a magnificent estate in a wonderful Maine town, which is the original find, Wesley Ficht, a Bethel (Me.) farmer, found kicking about a road. Wright has never forgiven himself for parting for a trifle with a gem which has become valuable, but he is not alone in his regrets, for a small fraction of its real value to Tiffany & Co. of New York.

Pierpont Morgan's recent tour in Italy was a success. He was met and stopped at a small station by a crowd of people. He was met by a crowd of people, and he was met by a crowd of people.

At many points along the Pacific Coast and in Oregon, this department of The Times has obtained, in small percentages, the number of communications received from the various points.

"Rock" was analyzed, stated to be "in immense quantity." The results are that mud free of the private apartments be panned from the quartz referred to.

IN THE EARTH.

RARE MINERALS, MINES AND METALLURGY.

POPULAR QUERIES AND EXPERT ANSWERS.

Answers to legitimate questions in metallurgy, metallurgy, chemistry or mining will be given here, but when of interest to the public or commercial world. Personal communications, or matters of local interest, or on ore, minerals, earths or metals of the kind, will not be answered, but should be written direct to analysts and answers. Address: The Times.

Recovering Manganese Dioxide.

RENO (Nev.) July 26.—(To the Editor of The Times): Having a chlorination plant, some distance from railroad and base of supply, I would thank you for a reply in The Times to the following questions:

(1) Can a recovery be had from the waste liquors of manganese dioxide?

(2) If such a recovery is possible, give me whereby it is done.

(3) Is there danger of handling chlorine water in the sunlight?

(4) Why is chlorine called "one of the deadliest poisons?"

(5) Is there a method of chlorination known as the "Deakin process?" If so, please give an outline of it.

ANSWER.—(1) and (2)—You do not state the original liquor. The assumption is that it is ordinary chlorination (acid solution) and that the waste liquor is a mixture of manganese dioxide and hydrochloric acid.

With hydrochloric acid the reaction would be in an inter-laboratory, and the waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

The waste liquor would be a mixture of manganese dioxide and hydrochloric acid. The waste liquor would be a mixture of manganese dioxide and hydrochloric acid.

tions, for that of the rest. On account of the occurrence of chlorine, bromine and iodine in sea water, the elements of this group are called halogen elements, and their metallic compounds haloid compounds.

(5) Yes, Good old Deacon's. It would take several pages to give it in detail, but the following summary illustrates it. It is a process for the separation of chlorine from hydrochloric acid, without the use of any manganese compound, has been introduced (some years ago) by H. Deacon. It consists in passing a mixture of hydrochloric acid and oxygen, or air over cupric sulphate (sulphate of copper), or other cupric salt heated to 700-800 deg. centigrade. (800-750 deg. Fahr.) the hydrochloric acid being then decomposed, its hydrogen combining with the oxygen, and the chlorine being set free. The best way of conducting the process is to pass the mixed gases over pieces of brick soaked in solution of cupric sulphate and dried. The action of the cupric salt is not well understood, but appears to belong to that class of phenomena called catalytic or contact actions. Other methods are used, but in a similar way, but less completely.

STROMANTITE. MILFORD (Utah) July 21.—(To the Editor of The Times): I am driving from near Twin Peaks. I came across a narrow seam of the sample enclosed. Will you please name it for me, at same time giving description and text.

Yours truly, D. J. F. ANSWER.—The sample is stromantite. Much of this has been forwarded to the U. S. Geological Survey, at Washington, D. C., and from Beaver, Kanab and Black Rock. The various specimens may have been obtained from the same source, but I cannot say otherwise, there will soon be another deposit of the mineral for commercial use.

Stromantite comes in white, pale yellow, green, gray, and gray colors. It possesses a resinous, vitreous luster. In hardness, it is brittle; habit, needle-shaped, and in pyramidal form. It is a silicate of strontium, calcium, barium, and cerium. It is a silicate of strontium, calcium, barium, and cerium.

It is a silicate of strontium, calcium, barium, and cerium. It is a silicate of strontium, calcium, barium, and cerium. It is a silicate of str

of scholarships. The Woodmen of the World in Los Angeles are interested in his candidacy and are vigorously supporting him. He is a member of the order. The following gentlemen have become scholarship boosters in behalf of Melvin: John H. Foley, J. F. Trause, Frank Bagley, F. E. Pierce, W. H. McGill, Thomas Barlow and S. L. Hall.

BLANCHE CUNNINGHAM.

The stranger within the gates of Los Angeles who seeks a scholarship.

which is the lack of a wheel. Now it does seem to me that this is the chance to do a kindly act. Some one who has a wheel which is not being used—and there are lots of them—would be glad to loan it to this child for the remainder of the contest. There are many interested and generous people who will take it as a pleasure to give this little girl a lift and help her to ride to a high place in the contest.

A fair-haired little maid in white dress and floating blue ribbons came to the Times office the other day with her father. She wanted to see how a big paper looks in its home, and she was especially interested in the scholarship department for she has a brother in the contest—Albert Capron—and she is helping him all she can. Alice collects coupons and even takes subscriptions for her brother and her eyes shine with affection and pride as she talks about it for she thinks there is no one quite like her brother. Alice has been especially active since Albert partially laid him aside, but he has a good lieutenant in his loyal little sister.

GOOD CATHOLIC GIRL.

Mary Lalich of Gardena brought in a bundle of coupons yesterday donated by the good people of Oliver and Gardena. This deserving little girl was accompanied into town by a kind-hearted neighbor who is trying to help her. Mary is a timid child and needs the interest of some one skilled in getting the attention of the great, busy, good-hearted world. She is of French descent but is a native daughter of California and has some influential friends here who learn that Mary is trying for a scholarship, will not doubt give her a lift in the way of a scholarship, as she has a good case for music and scholarship in some conservatory where she can have piano instruction. She has a good case for music and scholarship in some conservatory where she can have piano instruction. She has a good case for music and scholarship in some conservatory where she can have piano instruction.

STRANGER WITHIN THE GATES.

Blanche Cunningham labors under a disadvantage in that she is a stranger here, but she has plenty of energy and ability. She has been in the city only a few months but she has made many friends and acquaintances to help her out. She has good business sense, though, and did a shrewd thing under the circumstances when she ranked in the big hotels and manufacturing firms as her special field. "I believe in going after big game," she remarked in discussing the situation, "and I did splendidly until I fell ill."

This belief is unchanged when it is learned that railway surveying parties are working southward from Huacana. They are presumably working for the Burson road, which is now building connecting links along the beach and seems to have all the ready cash required in securing right of way. Landseekers who are evidently on the inside are pouring in large numbers into the mountains to the northwest of Santa Monica, where they are securing options on deeded lands and making filings on everything that is vacant.

THE CONNECTION NOW BEING MADE AT Santa Monica of the broad gauge tracks of the old Santa Fe line with the southern Pacific and an extension of the broad gauge tracks eastward over a newly acquired right of way are also significant straws. They indicate that there is something in the wind but just what that something is

for several days and then I dropped back two places and have not been able to regain my place since. I stand number thirteen now and it seems as if I was bound to stick there." She thoroughly believes now in the fatality of that unlucky number, for she has occupied the thirteenth line in the daily score for a week now, in spite of the fact that she turns in regularly a large number of points. Yesterday she brought in a new yearly subscription which sent her up a thousand points. Blanche has canvassed all the large hotels in the city and some of the big iron manufacturing houses, with splendid success. She has any amount of luck and grit and has a pretty good knowledge of human nature for a young girl. Knowing that she is absolutely dependent on her own efforts has increased her self reliance and doubtless she will land herself at least in the twelfth row before the week is out.

MEXICO FOR ORFILA.

The people of Sonora, Mexico have endorsed the candidacy of Orestes O. Orfila, of Tucson, Ariz., and they are supporting him enthusiastically and royally. Several large business votes and numerous complimentary letters have come from different points in the neighbor republic for Orfila. These letters are in that graceful and chivalrous language of which the Spanish mind and language is capable. A letter which arrived yesterday is characteristically ardent and enthusiastic and it is here given:

NOGALES (Sonora) Mex., July 23, 1905.

To the Scholarship Manager, The Times, Los Angeles, Cal. Dear Sir: We Mexican boys and students of St. Vincent's College of your fair City of Flowers, send you 200 coupons to credit our schoolmate Orestes O. Orfila, the Arizona contestant. Through your local agent, the Sonora News Co. of this Sonora State, we today send 2000 votes, mostly on new subscriptions. A couple of days ago we sent 1000 points voted by the treasurer of Santa Cruz Co. Prominent Mexican citizens are the contributors. The people of the rich State of Sonora like The Times for its truthful and impartial account of Yaqui troubles, and for always speaking well of the resources of our great State.

In Orestes, we find a brainy, though modest young man. One of the youngest of sophomores, yet a top notcher. He is a Los Angeles native son; now Arizona claims him, and Sonora opens new fields for him. All votes cast for him, will not be in vain, for he is bright, and ambitious. Respectfully yours,

F. PETTIER, A. JOFFROY, Students of St. Vincent's College.

PRIZES AT STAKE.

The contestant having the highest score at the close of the contest will have a couple of the following scholarships. The second highest will have second choice and so on to the bottom of the list. From time to time the list of scholarships will be enlarged as the number of contestants multiply. The Times already has one and in some instances two scholarships in every one of the following institutions. Every school is considered excellent in its line:

University of Southern California.
Throp Polytechnic Institute.
Dobson School of Expression.
Occidental College.
St. Vincent's College.
Los Angeles Military Academy.
Cunneen School of Expression.
Los Angeles School of Art and Design.
Los Angeles Conservatory of Music and Arts.
Boston School of Expression and Physical Training.
Department of Oratory, University of Southern California, Miss Baulah Wright, Dean.
Los Angeles School of Fine Arts.
Los Angeles Business College.
Southern California Business College.
Woodbury Business College.
Brownberger Home School.
V.M.C.A. Special Course of Study.
Long Beach Business College.
Pacific Telegraph School.
Castro's Select Academy of Languages.
Department of Oratory, Los Angeles Conservatory of Music and Arts, Bertha E. Hancock, Director.
Long Beach Conservatory of Music.
Academic Department Cunneen School of Expression.
Singer's Select Academy of Music.
Fillmore Piano School.
Lyrie School of Music, Luella M. McGinnis, principal.
Rosenbush's College of Garment Cutting and Ladies' Tailoring.
Warren's Mandolin and Guitar Schools at Pasadena, Los Angeles and Pomona.

CASH PRIZES ARE ADDED.

The scholarships, whose cash value runs into the thousands of dollars, will not be the only prizes at stake. The Times will supplement a number of the scholarships with cash prizes to help defray the student's incidental or living expense while attending school. Besides the scholarships the fourteen students who finish in the lead will receive cash prizes approximately as follows:

1. Cash with second choice of scholarship, \$150.
2. Cash with third choice of scholarship, \$125.
3. Cash with fourth choice of scholarship, \$110.
4. Cash with fifth choice of scholarship, \$100.
5. Cash with sixth choice of scholarship, \$90.
6. Cash with seventh choice of scholarship, \$80.
7. Cash with eighth choice of scholarship, \$70.
8. Cash with ninth choice of scholarship, \$60.
9. Cash with tenth choice of scholarship, \$50.
10. Cash with eleventh choice of scholarship, \$40.
11. Cash with twelfth choice of scholarship, \$35.
12. Cash with thirteenth choice of scholarship, \$30.
13. Cash with fourteenth choice of scholarship, \$25.
14. Cash with fifteenth choice of scholarship, \$20.

MUSICIANS NEEDED.

Ability and Faculty to Instruct Others How to Play Stringed Instruments.
The Lyric School of Music offers a scholarship to Times contestants, and any boy or girl who wishes to learn to play stringed instruments may here find the opportunity. It is a great talent to be able to draw sweet harmonies from the strings of the guitar or to pick out melody from the banjo and there is always an appreciation for this sort of music, and those who become sufficiently proficient to be able to teach others to do so are always in demand. Miss McCune, who is principal of the Lyric School, has the ability and enthusiasm to instruct pupils, not only in the graceful art of playing stringed instruments, but also in composition and transposition, which are just as necessary as the ability to pick the strings. The pupil must be familiar with the composition and transposition of music in order that he may speedily and correctly adapt a piece to his instrument and he must also have a general knowledge of the scale of every instrument with

Crawford SHOES

COME to our new store to-day—don't wait until to-morrow. You can't begin to wear Crawford Shoes any too soon. We have styles that will appeal to you. Crawford styles, in fact, set the pace for the high-class custom makers throughout the country. At the prices for which they sell they are within the reach of all. Remember we never sell Crawford Shoes on suspicion. For style, fit, comfort, and durability they are incomparable. Let us try a pair on you. If you don't find them to your liking, we will cheerfully refund your money.

While Crawford Shoes talk for themselves when you see them, you will find that they make another favorable impression when you try them on. If you will permit us to do this for you just once, you will more thoroughly understand our enthusiasm.

Write for our very attractive Crawford Booklet. It is yours for the asking.

Crawford Retail Prices \$3.50 and \$4.00

STYLE #12. BAL. NUBROR-COL. — A smart, dainty style—something new and decidedly exclusive. Has the "Pike" toe and military heel. A song, yet easy fitting last.
